

Compostable Soaker Pads

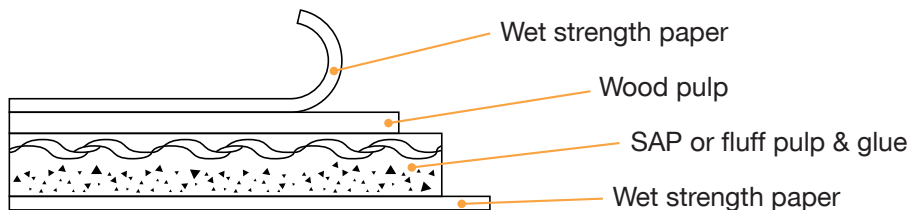

Suitable for Fruit / Vegetable / Meat / Poultry / Fish

Pad 1: SAP (Super Absorbent Polymer)

- SAP is not considered to be a plastic. Non-toxic, harmless, non-polluting, natural degradation. It's used in cosmetics, soaps etc and can be food grade.
- SAP is FDA approved food additive and used in bread juice and ice cream and had for years because it absorbs water.
- Water-retaining polyacrylate crystals are added to regular potting soil into that really expensive potting soil to increase water retention. Polyacrylate crystals sell at the garden centres.

Pad 2: Fluff pulp

- Fluff pulp is made from paper and high absorbent option to SAP.
- All papers use are compostable and degrade naturally.
- Certification: FDA, CE/EU compostable, FSC, MSDS (laminated FSC pulp).
