

Managed Backup

Features & Functions

What

veeam Backup for Office 365

Basic rules of backup in 3 steps

Where

We have modernized backup solutions to help protect data on-premises and in the cloud. Our backup services will empower you to choose the best scenarios to protect your data whether in Amazon Web Services (AWS) Cloud, your on-premises environment, our Vats DC1 data center in Norway, or a mix.

Repository alternatives:

Vats DC1
(Åmsosen, Vats – Norway)

Why

Secure your data – protect your business from cyber threats like ransomware
