Window Gang gave us an easy, step by step system to follow that made acquiring new customers easy, and doing the work even safer & easier.

Take Ownership of Your Schedule

The best part of owning your business is owning your destiny. Work as much, or as little as you want. The future is yours and the sky is the limit on what you can take home.

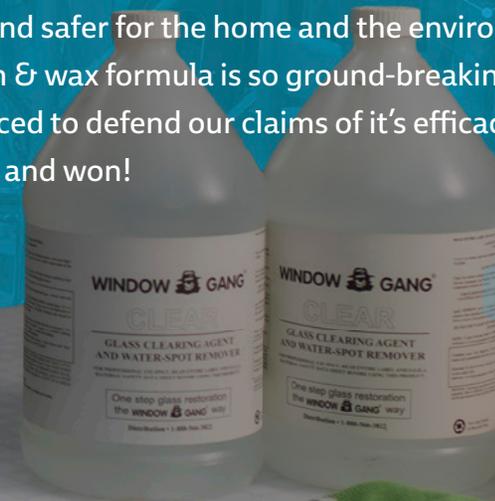

LIMITLESS POTENTIAL

Many of our owners have built seven figure businesses with Window Gang. The sky is the limit and your window of opportunity is open!

THE *SCIENCE* OF BETTER CLEANING!

Our founder, Tim McCullen is known as the 'mad scientist' of the exterior cleaning industry. He is constantly innovating and over the past three decades he has developed dozens of exclusive chemical blends, processes and machinery that give us a huge advantage over our competitors.

Our products are not only more effective at cleaning, but gentler and safer for the home and the environment. Our wash & wax formula is so ground-breaking that we were forced to defend our claims of it's efficacy in the courts.... and won!

SERVICE **BEYOND** YOUR EXPECTATIONS

The core of our success is summed up in our motto, "Service Beyond Your Expectations". This goes deeper than simply performing services well. We've pioneered many techniques and products in the cleaning industry beyond just window cleaning. Our owners have access to multiple revenue generating and cutting edge services to ensure they are as busy as they would like to be.

WINDOW CLEANING

Window cleaning is what we're known for and it's also where we are the most unique. Our wash & wax formula is unlike anything else out there.

GUTTER CLEANING

Few things are as important as clean gutters when it comes to protecting against water damage. Most homes require gutter cleaning at least twice per year.

PRESSURE WASHING

Outdoor areas such as driveways, walkways, decks, fences and many other parts of the home need regular cleaning. Many HOAs even require it!

SOFT WASHING

Soft-wash or chem-wash is a process that not only cleans, but kills mold, bacteria, and viruses. This versatile method is used on siding, roofs, and even for disinfecting common areas

DRYER VENT CLEANING

Dirty dryer vents cause over 17,000 homes to catch fire each year. The US Fire Administration recommends cleaning & inspecting the dryer duct and venting at least every two years.

CHIMNEY SWEEPING

Chimney fires are another big safety risk for homeowners. The National Fire Safety guidelines recommend that homeowners sweep their chimneys a minimum of twice a year.

& MANY MORE!

We have many treatments for oil remediation, no slip floors, window film, blind cleaning and many other options to keep your business profitable all year long.

“Our franchise was able to weather the recession of 2008 and have been able to maintain a busy schedule in 2020 because our services are not just necessary, but our customers understand that they are saving money through proper maintenance.

GREENVILLE FRANCHISE OWNER
