Dear ACE Challenge Team:

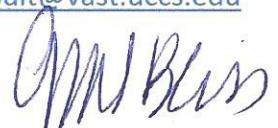

The ACE Blockchain Challenge provides an excellent opportunity to develop an ecosystem focused on teacher data agency. University of Colorado Colorado Springs is pleased to provide RANDA Solutions, and BlockFrame Inc. this letter of support and acknowledgement of our intention to participate in this ecosystem. RANDA Solutions is long recognized for providing cutting-edge technology to manage education data and we are confident in the ecosystem approach to supporting teachers. The University of Colorado, Colorado Springs is so confident in their approach that we have engaged BlockFrame in a research and development contract for the last three years and added RANDA as a partner in the last year. We feel this opportunity will help them to field the first in many solutions to come.

University of Colorado Colorado Springs looks forward to collaborating with the community involved in this ecosystem and the approach putting teachers at the core of education and improving learning outcomes.

Sincerely,

Terrance Boulton
