VirtualCabinet

GDPR Snapshot

GDPR has been in effect since 25 May 2018, impacting everyone who deals with EU data. Businesses that fail to comply risk heavy fines. Here are a few ways Virtual Cabinet can help you comply with GDPR, automate processes and improve business efficiency.

Automated Archiving
Organise your data, storing it easily and accurately in a compliant manner.

Internal Processes
Use workflows and tasks to streamline and document your business processes.

Centralised Data
Save your data from network, local PC's, USB's, paper and Outlook in one place.

Right To Access
Handle data requests with ease. Retrieve customer records in a matter of clicks.

Secure Portal
All correspondence in a secure portal, with tools like retraction for missent files.

Audit Trail
Easily carry out reviews, and report on data breaches within 72 hours.

Security & Encryption
Control user access permissions. Get end-to-end communication encryption.

Document Retention
Set expiry dates on files for automatic deletion. Reduce server costs.

Principle Of Least Privilege
Minimise personally identifiable data managed by your teams.

Right To Be Forgotten
Powerful search capabilities make it easy to find and delete all customer records.

Privacy By Design
Privacy must become a part of an organisation's default mode of operation.

Staff Training
Get the tools and processes your staff need for ongoing compliant operation.
