Marine Conservation Scholarships

(5 for women; 2 for a woman or man)

Marine conservation has been our most popular and most competitive scholarship opportunity for several years. In response to the high number of competitive applications, WDHOF and our sponsors continue to offer several graduate and undergraduate scholarships in marine conservation. Up to four scholarships (\$2000 each) will be awarded to qualified **women of any age** who are enrolled in an accredited graduate academic or research program in the field of marine conservation.

One scholarship (\$2,000) will be awarded to a woman or man to support a graduate project in applied marine conservation biology. **Women or men** with current enrollment in a marine science or marine policy degree-granting graduate program are eligible to apply.

Up to two scholarships (1 @ \$1500 and 1 @ \$1000) will be awarded to qualified **women or men** of any age who are enrolled in an accredited undergraduate academic or research program in the field of marine conservation.

These scholarships are intended to support independent research and/or fieldwork at an accredited university; they will not support tuition, living expenses or student loan payments. The applicant should clearly state how the intended use of the scholarship will advance marine conservation. A research proposal detailing the conservation objectives, methods, and anticipated results is required.

J. Berman Memorial Grant for Sea Turtle Conservation (**women only**)

One \$2000 grant will be awarded to a qualified **woman of any age** to advance the conservation of sea turtles. Applicants do not need to be students or enrolled in a degree-granting program. The funds are intended to support a sea turtle conservation activity--and not conservation research. A conservation plan should be clearly defined to detail the actual conservation activity and the anticipated outputs and outcomes. The budget should be specific. The scholarship may be used to support tuition, participation in a journalism, graphic arts, or photography workshop, or an internship program at an accredited university. It may not be used for student loan payments, housing, or prior incurred expenses. The application should detail specific plans for how the scholarship will be used, and how the outcome of the scholarship will be applied to better serve the ocean environment or ocean community.

- **Sponsored by** WDHOF Members [Michele Hall](#), [Andrea Stockert](#), and [Karen Straus](#) in memory of WDHOF Member [Bonnie Cardone](#)

Laurel Clark Sea To Space Physiology Research Grant (women or men)

Two (2) \$5000 grants will be awarded to support graduate research in extreme environment physiology (diving, altitude, and/or space). **Women or men** with current or pending enrollment in a degree-granting graduate program are eligible to apply. A research proposal detailing the objectives, hypotheses to be tested, methods, anticipated results, and alternative approaches is required. The grant is for 18 months, during which time the recipient will be expected to have completed the proposed research. It is expected that results of the research will be submitted for presentation at an academic conference and/or submitted for publication in a peer-reviewed journal within 6 months of project completion. A detailed budget, with justification, is required with the application. Only direct costs related to the research will be covered (e.g., equipment, supplies, travel, partial tuition); the grant opportunity does not cover indirect costs and cannot be used solely for tuition. A financial report detailing how funds were used will be due no later than 18 months after the award is issued.

- **Sponsored by** Jon Clark, in memory of his wife [Dr. Laurel Clark](#), a medical doctor, U.S. Navy Captain, accomplished diver, and NASA astronaut

Undergraduate Marine Research Internship (women or men)

A \$1,000 scholarship will be awarded to a still-matriculated undergraduate student (**woman or man**) who will be participating in a confirmed internship program with a focus in marine biology. The internship and logistical details should be identified by the applicant and provided with their application packet. If the applicant has not yet received the internship award, s/he should provide details for one or more applications that the applicant has submitted but not yet received confirmation of the award (but note that receipt of the UMRI award is preferential to an applicant with an internship confirmed). Students must provide documentation to verify that they have completed at least 60 credits or hold third-year (junior) status prior to starting the internship; applicants must still be enrolled in an academic program during participation in the internship for which they are applying. This scholarship can be used to offset expenses (e.g., travel, lodging, research expenses) related to the internship. The internship is typically ~3 months (or completed during a summer session), though longer duration exceptions will be considered. DEADLINE for application is JAN 15, 2023.
