

hh2 Remote Payroll® Mobile Time Entry

hh2 Remote Payroll is a cloud-based time entry solution for construction.

It supports both employee labor and equipment time. Tight integration with many of the popular construction-specific accounting systems or ERP software solutions eliminates the need to transcribe paper timesheets or perform double entry. It allows a high degree of customization with many configuration options, time entry methods, approval paths, custom permissions and reporting options. Finally, a time entry solution that was built for the unique needs of construction.

Making Construction Mobile

Customizable Approval Process

Want your employees to enter their own time? No problem. Want your supervisors to handle time entry? We support that, too. In fact, we support rules-based routing where you have precise control over who enters and approves the time each step of the way. hh2 Remote Payroll supports multiple approval levels, types, report viewers and passive approval. With a host of additional options, security and permissions, hh2 delivers a time entry system that can be customized to fit your unique needs.

Optimized for the Device

hh2 Remote Payroll is a cloud-based time entry solution. Your employees or their supervisors log their time through a web browsers for desktops or through native mobile apps on iOS and Android. Each interface has been finely crafted for the device you are using. With hh2 Remote Payroll, you are able to enter, code and approve your time from anywhere.

“Our payroll department saves time processing payroll which saves money each week. There is less stress when we can manage all the time cards in one environment and make any necessary changes in hh2 before importing into our accounting software.”
