

Summer loving had me a blast!

COVID-19 traffic light system

In these ever-evolving times we remain committed to keeping our patients and visitors safe and protected. All our staff are 100% double vaccinated and focused on playing their part in minimising risk to patients. As a close contact business, we are obligated to follow the vaccine certification rules and require all patients to show proof of vaccine.

If you are unable to show proof of vaccine through New Zealand's 'My Vaccine Pass Verifier' your appointment may have to be rescheduled to a suitable time. If you don't have an electronic vaccine pass you can go to any pharmacy and request a printed copy. Jump online to mycovidrecord.health.nz to access My Covid Record and find out more.

we're moving on out!

They say change is as good as a holiday, and we're excited to share the news that Da Vinci Plastic Surgery Clinic will be in its own purpose-built clinic by the end of 2022. Whilst we're staying secret squirrel on design details and location, the building works are underway with internal framing going up! Our wonderful Suzanne, interior designer, and architect were treated to a first site visit by Paul of Fosters Construction who are hard at work. We look forward to sharing future updates with you as the project progresses.

skin essentials, rejuvenation must-dos and protective measures to see you through

Summer of 2021 is a welcome addition after a year that was! And, those warmer days, longer nights gift the perfect time to unwind and attune fresh perspectives for the year ahead. Charging forward with positivity and joie de vivre is what us Kiwis are adept at, and this season we're sending you forth with much to sing and dance about! Facial rejuvenation is on the pre-Xmas cards: appearance medicine treatments to glow about, skin checks to tick off the list, sunblock essentials to keep you protected from dawn till dusk, and blepharoplasty to rejuvenate the eyes – and all performed right here in our clinic. Speaking of clinic, we are thrilled to announce a sea change – next year we'll be stepping into a new premise, stay tuned! Whatever this summer shapes up to be for your family and friends may the days be full of life, relaxation and reprieve – merry Christmas from us to you!

eye spy

The eyes are the windows to the soul and one of the first areas of the face to lose volume, sag and showcase a 'sunken' appearance. So, there's no time like the present to freshen them up! Surgical blepharoplasty works to lift and restore – either an upper or lower lid lift – or both, and we can perform it right here in our clinic under local anaesthetic. The results? Tired and fatigued eyes diminished, heavy droopy lids gone and excessive, wrinkled or crepey skin removed. Best results begin and end with a skilled hand, speak to our team about this eye-opening procedure.

slip on the protection

Sunblock is the number one go-to for year-round protection against harmful UVA and UVB rays, so don't forget to pack this top defender into your holiday suitcase and beach bags! We're proud supporters of the Skinnies range of gel-based sunscreen. Not only is it suitable for all skin types (and vegans), but it's manufactured sustainably - making it the ultimate eco-friendly protector. The range includes a tinted block, and because Skinnies isn't diluted - unlike other sunblock brands which can contain up to 70% of water - it stays on your skin like a concentrate, protecting it for longer - even in the water.

Skinnies SPF 30 \$35.50, Conquer SPF 50 \$42 and Tinted SPF 30 \$39.50 - pop into our clinic and arm yourself!

Facial rejuvenation has one focus - you.

So, this silly season reach out to our cosmetic and skin specialists to naturally enhance and restore your appearance. Botox® and dermal fillers reduce fine lines, soften and volumize, Belkyra® injections rid chin fat and sculpt the jaw, and our gentle TCA peels improve skin tone and texture, conquer light wrinkles, reduce skin discoloration, freckles and age spots.

Now's the time to address your skin before you peel back the layers. Why? "Because skin lesions can be easier to examine pre-summer sun exposure," explains Adam Bialostocki, Da Vinci Plastic Surgery Clinic's cosmetic and reconstructive plastic surgeon, and skin cancer expert. "During summer, the skins behaviours heighten - sun freckling and tanning occurs on sun-exposed places - which can make it harder to notice changes in moles - or any new moles - and unusual skin behaviours. New Zealand has one of the highest rates of skin cancer in the world, with basal cell carcinoma the most common, and squamous cell and melanoma the most rapid growing," explains Adam. "Melanoma can strike at any age and present on any part of the body, which is why skin specialists are experts at examining all hidden areas." Don't leave your skin to chance, book in your skin check with our surgical team.

scan your skin

Locking in a skin check before you step outdoors provides greater skin peace-of-mind and assurance.

roadworks and health updates

We apologise to all patients and visitors navigating the roadworks on Cameron Road - one of those essential jobs but still not ideal for those making their way to us! So, to ensure you make your appointment, please allow ample travel time. Living and working in a COVID environment means that we must stay abreast of any new developments and changes, so please read our health texts prior to appointments as they can change daily.

shine on with rejuvenation top guns

Christmas at our place!

To ensure you don't miss out on your treatments this summer, secure your spot before Santa rolls into town. Our hours of operation across the Christmas and holiday period are:

- Closed from midday 23rd to 28th December 2021
- Open 29th and 30th December 2021
- Closed from 31st December 2021 to 4th January 2022
- Open 5th and 6th January and closed 7th January 2022
- Back to normal hours from Monday 10th January 2022

If you require urgent attention while we are closed, please see your GP or present at Accident and Emergency who will contact our surgeons Adam or Brandon. We will respond to your phone messages and emails during our operational hours.
