EMR Performance

Softek's custom-built Panther software has been monitoring Cerner® Millennium™ performance since 2000.

Our Software gives IT and application analysts at hundreds of Cerner® hospitals daily visibility into the performance of their EMR system.

Softek is your Cerner® EMR Expert

“ We have spent a lot of time with Softek, and they have been able to point out things that weren't right in our build. We would have missed a lot of money if Softek hadn't caught certain issues. They have come up with some productivity reports that have information that we weren't able to see in our EMR. Our Softek representative has also been really instrumental in all the work we have done.

”
- Director
