Get Insight into your Cerner® Charging Process with Softek's Charge Capture Controls

Softek®

Charge Capture

Cerner's charging process is very complex, making it difficult to know where missed charges are occurring within your system.

Softek's Charge Capture controls monitor the charging process real-time, finding missed charges stemming from orders, forms, supplies, physician notes and other charging processes within Cerner®.

Softek Brings Visibility to your Cerner® Revenue Cycle

"Softek has a tremendous knowledge of Cerner®. Softek is extremely responsive, and they go above and beyond what other vendors normally do. Softek delivers on what they say they are going to deliver. Softek continues to treat us as customers, support us, and answer our questions. We have had a great partnership. **Softek is probably one of the best vendors I have ever worked with in all my years working in healthcare.**

Softek's Charge Capture Suite

Physician Documentation

Gives insight into instances where hospitals' provider documentation does not match a corresponding charge broken down by facility or physician.

Form Integrity

Audits clients' charge activity and provides insight into form-based charging. Clients can review form activity over the last day, week and month.

Formulary Compliance

Alerts hospital administrators of key issues in the system, such as missing or incorrect HCPCS codes or QCFs.

Order Integrity

Compares patient orders & corresponding charges along the entire transaction process.

Supply Charging

Monitors all surgical case activity and pinpoints which encounters and items may be missing charges.

Charge Reconciliation

Allows users to define search and filter criteria that brings back only the charges the user is interested in reconciling.

Charge Reports

Reports include: Batch Charge Entry fails, Absorbed Charges, Suspended Charge reports and many more.
