

Together, the osteosarcoma community has the power to move research forward.

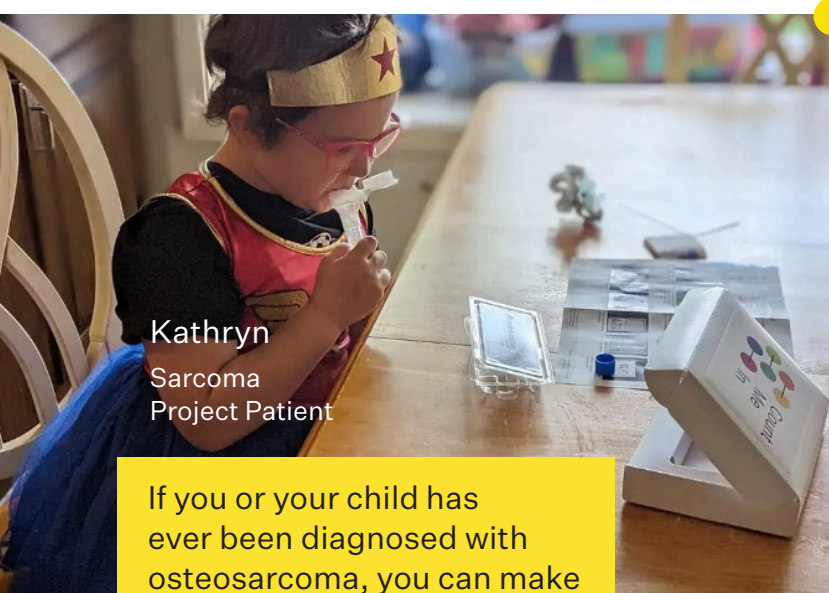

Count Me In's patient-partnered research project helps to generate the most comprehensive osteosarcoma database to accelerate research and the development of new therapies.

You hold the key to unlocking future discoveries.

"What's exciting to me is that it's so easy to participate, because with rare cancers, there just aren't enough medical samples out there, so to be able to participate from anywhere in the country to help progress research is amazing."

Maeve

Osteosarcoma Project Patient

Kathryn
Sarcoma
Project Patient

If you or your child has ever been diagnosed with osteosarcoma, you can make an impact by sharing your samples, experience and access to medical records.

Join by completing these 4 easy steps:

Step 1

Provide consent and tell us where you've been treated.

Step 2

Answer questions about your cancer.

Step 3

Provide samples (we'll send you a kit.)

Step 4

Learn with us along the way!

Scan the QR today,
and help change the
future of osteosarcoma.
