

An Open Tokenized Economy for Commerce

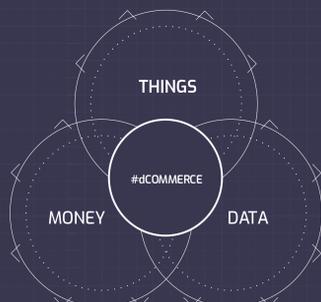

Boson Protocol enables a decentralized commerce ecosystem where all participants share in the value they create.

ABOUT THE PROJECT

Boson Protocol automates digital to physical redemptions using NFTs encoded with game theory.

Our technology disrupts e-commerce platforms by tokenizing Things and their data within a liquid digital market, built on #DeFi.

WE CALL THIS: DECENTRALIZED AUTONOMOUS COMMERCE.

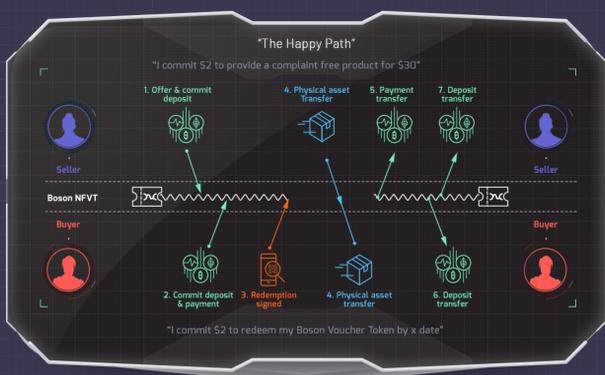

PROBLEM

Powerful e-commerce platforms have captured the market. These monolithic intermediaries extract excess value. They claim to value customer-centricity when what they are really doing is hoarding data and separating people from the value they create. Worse than that, they distort markets and supply chains and interfere with our economic systems, imperiling consumers, firms and even governments. Unless we can solve this problem: **We face the prospect of the total capture of commerce and its supply chain by a few extractory monopolies.**

SOLUTION

What is needed is a way to execute commerce transactions without centralized intermediaries and with minimal arbitration, cost and friction. **Boson Protocol Automates digital to physical redemptions using NFTs encoded with game theory.** Our core technology disrupts e-commerce platforms by tokenizing real-world products and services and commerce data within a liquid digital market, built on #DeFi. Boson Protocol enables a decentralized commerce ecosystem where all participants share in the value they create.

VALUE ACCRUAL

\$BOSON tokens accrue value from a minimally extractive fee for coordinating transactions and when third parties pay to access commerce data via the Boson Web3 data marketplace.

This enables Boson to unlock two planetary-scale value pools:

GLOBAL DECENTRALIZED NETWORK FOR COMMERCE TRANSACTIONS.

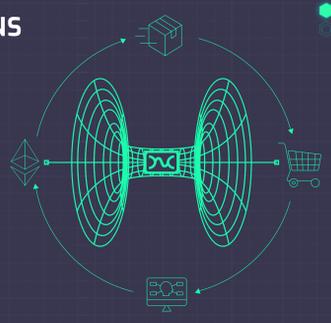

GLOBAL WEB3 DATA STORE FOR COMMERCE DATA.

ROADMAP

NFT COMMITMENT TOKENS

Boson automates digital to physical redemptions by tokenizing a Buyer and Seller's commitment to exchange digital value for a real world Thing at a later date. Commitments are made by depositing digital value into an escrow represented by a stateful non-fungible commitment token.

USE-CASES

- Online Commerce:** Open digital marketplaces where any Thing can be offered, searched and exchanged with minimized trust and cost.
- Crypto Exchanges:** Enabling exchange tokens to be redeemed for real world rewards directly from an exchange marketplace without touching fiat.
- Tokenized Networks:** Enabling users to exchange their network tokens for digital and physical goods and services, in order to increase user-perceived value and token value.
- Loyalty and Rewards:** Enabling loyalty programs to offer any digital or physical Thing in a standardized, composable and interoperable digitized format, without the cost and friction of intermediaries.
- Machine-to-Machine Commerce:** Enabling self-driving cars to purchase tyres or servicing with autonomous management of disputes and redemption.
- i-Gaming:** Enable online and on-chain casino customers to earn real world prizes and purchase real world items with winnings without touching fiat.
- Physical Twins of Digital Art:** Enable NFT artists to offer physical twins, trustlessly via NFTs redeemable for physical artefacts.
- Games:** Enabling video games to gift or grant permission to buy rare or special items. For example, on reaching Grand Wizard status, a player has the right to buy a special t-shirt.

FOUNDING TEAM

Justin Banon
CEO & Co-Founder

Tech Unicorn Builder
As global MD, bootstrapped Priority Pass from a \$50m to \$1bn revenue digital voucher marketplace

Blockchain strategy consultant
Digital business model researcher
MSc innovation,
MSc Digital Currency

Gregor Borosa
Tech Co-Founder

Lead Engineer
Major bank & payment systems, including Central Bank of Slovenia

Blockchain Technologist
Taught masters blockchain courses
Blockchain architecture consultant & dev

Computer science background
Masters Business Informatics,
MSc Digital Currency

ADVISORS

Dr Trent McConaghy
Founder, Ocean Protocol
Advisor, Investor

Jamie Burke
Founder, Outlier Ventures
Advisor, Investor

Dr Zeynep Gurguc
Imperial College London
Cryptoeconomics Advisor

Marina Markezic
Unlaweked Legal & Governance Advisor

Dr Michael Zargham
Founder, Blockscience
Token Engineering Advisor

Jordan Lyall
Founder of SMEME Project
Product Lead at Consensusys

KEY TEAM MEMBERS

Matt Law
Chief Strategy

Dr Anish Mohammed
Protocol Design

Sebnem Rusitschka
Ecosystem Architect

Shawn Anderson
Token Engineer

Dr Akaki Mamageishvili
Lead Researcher - Exchange Mechanism

Eoin Whelan
CFO

"Boson Protocol's vision is to enable a Decentralized commerce Ecosystem by funding and accelerating the development of a stack of specialist applications to disrupt, demonopolize and democratize commerce."

Token Disclaimer

This document is for information, illustration and discussion purposes only and nothing in this document shall constitute a recommendation, offering or a solicitation of an offer to buy any securities or financial instruments of any kind in any jurisdiction. In particular, the sale of Boson Tokens ("Tokens") referred to in this document is not directed at Excluded Persons (as defined below).

The Tokens are cryptographic utility tokens usable on the Ethereum blockchain and allowing, in the long term, to access the functionalities of the Boson Protocol which includes, inter alia, purchasing transaction coordination services, and eventually using the Tokens to purchase consumer product preference data from the Boson Web3 data marketplace. Therefore, the Tokens should not be identified or construed as a security or financial instrument of any kind and potential purchasers should only purchase Tokens for its utility and in such quantities as will actually be used by such purchaser in the foreseeable future.

Information in this document ("Information") is provided by BVoucher Sales Pte Limited (Company Registration No. 202040027D) t/a Boson Protocol ("BVoucher"). Information has been provided on an indicative basis and shall not be considered binding, exhaustive or final in any way. BVoucher makes no representation or warranty, express or implied, as to the accuracy or completeness of such Information and reserves the right to amend, modify or supplement any of the parameters thereof with no prior notice. BVoucher may publish an updated version of the Information provided herein at a later date.

"Excluded Persons" refers to the following person(s): (1) a person who is a citizen, domiciled in, resident of, or physically present / located in the United States of America, People's Republic of China and such other jurisdiction that BVoucher may determine (each an "Excluded Jurisdiction"); (2) a body corporate: (a) which is incorporated in, or operates out of, an Excluded Jurisdiction, or (b) which is under the control of one or more individuals who is/are citizen(s) of, domiciled in, residents of, or physically present / located in, an Excluded Jurisdiction; and/or (3) an individual or body corporate which is otherwise prohibited or ineligible in any way, whether in full or in part, under any laws applicable to such individual or body corporate from participating in the sale and purchase of Tokens.
