

## Other Accessories

Zephyr has other options to enhance your blower.

**HI-STATIC FANS** are available. A larger diameter fan increases the static pressure of a blower. If you do not need the additional c.f.m. from a larger blower, but need a small boost of pressure, this is a good option.

**BOOSTER BLOWERS** attached to one of our larger blowers can power solo divisions, and high pressure reed stops. There are many ways to configure blowers to meet your needs. Contact us for help.

**CUSTOM ENCLOSURES** are available. We make boxes for our smaller, high-speed blowers in a variety of sizes and finishes. We also make custom enclosures for our 2-stage blowers.
