

Shop Detailing

Modern fabrication facilities rely on complete and accurate detail drawings, material reports and fabrication data to drive their workshops.

We have three decades of experience providing fabrication deliverables to suit the evolving needs of the fabrication industry. We have provided shop detailing for fabrication including structural steel, bridges, platework and complex mechanical items.

Our suite of detail deliverables includes:

- Assembly and fitting drawings.
- Module and sub-assembly drawings for modularised projects.
- Workshop set outs and jigs for complex modules and platework.
- Marking plans & bolt lists for site erection.
- Site erection details for brownfields projects.
- Lifting and transport grillage.
- Fabrication data files and reports.
- Navisworks models.
