

Unlock time-sensitive data to make informed decisions faster

Complex, varied, and data-rich documents dominate alternative investment workflows, causing operational headaches for general partners (GPs), limited partners (LPs), managers, portfolio companies, and anyone else touching this critical information. Manual data extraction, transformation, and processing stand in the way of decision-making, analysis, and quick action, leading to missed opportunities and high costs.

<p>Your customers expect clean data and thorough reporting</p>	<p>Your highly skilled employees expect rewarding and impactful work</p>	<p>Your partners expect quick action</p>
---	---	---

Alkymi™ can **accelerate financial services-specific data extraction by up to 98%***, enabling investment professionals to rapidly scale the collection of time-sensitive data from over 27 file formats and incorporate it into operations while maintaining accuracy.

Benefits

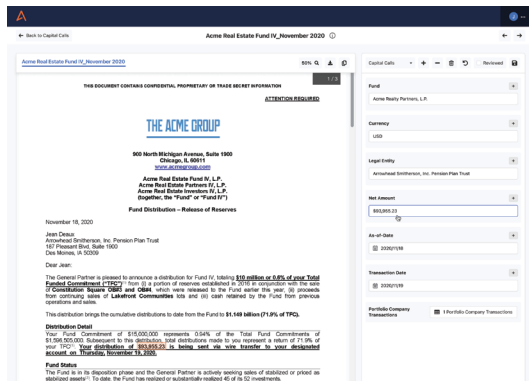

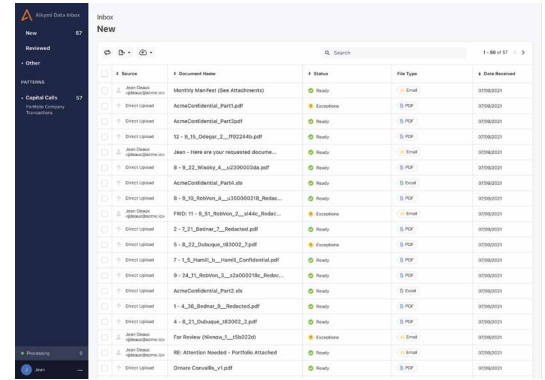

With Alkymi, you receive structured and validated data in a single, easy-to-use tool—giving your team the confidence to take immediate action with an auditable trail to the data source. The results?

- Ability to access and process more data using your existing workforce
- An upgraded customer experience through faster service
- Increased employee satisfaction and reduced burnout
- Improved operations and compliance
- Reduced risks related to manual copy/pasting
- More time spent on analysis leads to smarter investment decisions
- Reduced friction in GP and LP communications

*compared to manual processing

Key features

Alkymi combines financial service expertise, real-time data extraction, and a human-in-the-loop architecture to supercharge your workflows. Alkymi Patterns leverages machine learning (ML), natural language processing (NLP), and computer vision to extract and structure targeted data. Alkymi’s Data Inbox™ seamless workflow and enterprise integrations accelerate your overall alternatives processes. Together, they help your employees complete the necessary work faster to better serve your clients and partners.

- Built for humans** → Accelerate adoption and decision-making with an easy-to-use UI
- No-code automation** → Build and deploy your own Patterns to automate workflows
- Industry-grade compliance** → SOC 2 compliant; best-in-class security
- Enterprise integrations** → Create end-to-end workflows by connecting with out-of-the-box API integrations

Leading customers implement Alkymi to automate:

- Capital calls & distributions
- Quarterly reports/SOI
- CAS/PCAP
- Exposure & allocation reports
- Product placement & offering memorandums
- Confidential information memo (CIM)
- Due diligence questionnaire (DDQ)
- Tax documents
- Monthly financials

Alkymi delivers the automation necessary for operational success and empowers control and governance over the data that ultimately forms a valuable analytical tool in alpha generation.
