This Key Information Document is accurate as of 30/09/2020.

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

The Fund is a Luxembourg public limited liability company with variable share capital ("SICAV-SIF"). It has an umbrella structure and therefore consists of several sub-funds, including the European Loan & Bond Fund (the 'Sub-Fund').

Objectives

The Sub-Fund invests in a diversified portfolio of loans to European companies. Loans referred to herein include bonds, loans or other debt and debt-related instruments. These instruments typically have a medium term investment horizon and show low correlation to traditional asset classes such as shares and bonds. Loans to companies also typically offer higher return than other types of fixed income instruments.

The Sub-Fund targets a total return in excess of Euribor 3 months + 3%.

Given their characteristics, the instruments in the portfolio may have relatively large movements in their prices that may have an impact on the return of your investment.

Intended retail investor

You will need to demonstrate that you meet the definition of a 'well informed investor' before subscribing (please refer to the Offering Document in this respect).

Term

The Sub-Fund has been established for an unlimited period of time and is open-ended. However, it may be dissolved by the Board of Directors of the Fund if they deem it useful to protect your interest. Please refer to the Offering Document of the Fund for further details on closure of sub-funds.

What are the risks and what could I get in return?

Risk Indicator

The actual risk can vary significantly if you cash in at an early stage.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Sub-Fund as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the Fund's capacity to pay you.

Investing in this Sub-Fund entails important financial risks as well as other risks. There is no guarantee that you will get your invested money back when investing in the Sub-Fund. The Sub-Fund also does not include any protection against movements in financial markets, interest rates or other factors.

Other risks materially relevant to the PRIIP not included in the summary risk indicator:

More details on the risks you may face by investing in this Sub-Fund are fully described in the Offering Document of the Fund.

Performance Scenarios Investment USD 10,000.00		1 year	3 years	5 years (Recommended holding period)
Stress scenario	What you might get back after costs	3,610.10 USD	4,999.74 USD	4,081.02 USD
	Average return each year	-63.90 %	-20.63 %	-16.41 %
Unfavourable scenario	What you might get back after costs	9,131.66 USD	8,961.26 USD	9,038.10 USD
	Average return each year	-8.68 %	-3.59 %	-2.00 %
Moderate scenario	What you might get back after costs	10,514.25 USD	11,225.39 USD	11,984.62 USD
	Average return each year	5.14 %	3.93 %	3.69 %
Favourable scenario	What you might get back after costs	11,246.26 USD	13,062.75 USD	14,762.93 USD
	Average return each year	12.46 %	9.31 %	8.10 %

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest USD 10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past, and may not anticipate any future performance. What you get back will vary depending on how the markets perform and how long you keep the investment. The stress scenario shows what you might get back in extreme market circumstances and does not take into account the situation where we are not able to pay you. The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you may get back.

What happens if the Fund is unable to pay out?

There is no compensation or guarantee scheme in case of default of the PRIIP Manufacturer. However, the assets of the Sub-Fund are segregated by law from the assets of other Sub-Funds of the Fund. The assets of the latter are also segregated by law from those of Capital Four AIFM A/S. The assets of the Sub-Fund are under custody and supervision of the Fund's depositary bank, The Bank of New York Mellon SA/NV, Luxembourg Branch.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest USD 10,000. The figures are estimates and may change in the future.

Costs over time

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment 10,000.00 USD Scenarios	If you cash in after 1 year	If you cash in after 3 years	If you cash in after 5 years
Total costs	135.85 USD	328.46 USD	549.68 USD
Impact on return (RIY) per year	1.36 %	1.00 %	0.93 %

Composition of Costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period
- the meaning of the different cost categories

One-off costs	Entry costs	0.10 %	The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less.
	Exit costs	0.00 %	The impact of the costs of exiting your investment.
Recurring costs	Portfolio transaction costs	0.25 %	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	0.58 %	The impact of the costs that we take each year for managing your investments.
Incidental costs	Performance fees	0.00 %	The impact of the performance fee.
	Carried interests	N/A	N/A

How long should I hold it and can I take money out early?

This Sub-Fund has no required minimum holding period. It may be suitable to you if you are contemplating a medium to long term investment. You may sell your shares on any dealing day, as further described in the Fund's Offering Document. The value of your investment may go down as well as up, depending on general financial market conditions, foreign exchange rates versus the euro, the level of interest rates and/or movements in loan prices. Other factors, as further described in the "Risk Factors" section of the Offering Document, may influence the value of your investment.

How can I complain?

Should you wish to complain about this Fund, you should address a written request to Capital Four AIFM A/S, Per Henrik Lings Allé 2, 8. Floor, DK-2100 Copenhagen Ø, or email info@capital-four.com.
