

# Managing Environmental and Social Governance (ESG) DATA

When making sustainable investment choices, investors require a vast collection of unstructured, alternative, and structured data to track real-time changes needed for decision-making and risk management. Alkymi Data Inbox helps firms instantly access, use, and act on ESG data from diverse document formats including images, graphics, charts, tables, maps, text, and more.

## Unlock data in real-time, cost-efficiently

Automate real-time extraction of diverse ESG performance data without needing a large team. Easily add new data sources, scale processes as required, and trace data back to the source.

## Streamline portfolio assessment and reporting

Collect a broad set of auditable data for your existing portfolio to track performance across material ESG factors with accuracy. Effortlessly prepare ESG-factor fund reports catered to your needs.

## Identify new investment opportunities quickly

Gain reliable insights by analyzing timely data. Create new, and update existing, ESG investment products, portfolios, and indices

Environmental progress & sustainability	Data & Information Security	Climate Risk & Emissions
Board Materials	Corporate Governance Reporting	Diversity
Equal Opportunity	Public Disclosure (EDGAR, 13-F, N-PX)	Global Reporting Initiative (GRI)
Sustainable Accounting Standards	Climate-Related Financial Disclosures	Datasets & Datafeeds

## Alkymi Data Inbox: Key Features

Data Inbox combines financial services expertise, real-time data extraction, and human-in-the-loop in an enterprise-ready product.

<b>Real-Time Data Extraction</b>	Automates data extraction from emails, text, tables, charts, capital notices, company prospectuses, product reviews, and more.
<b>Validated and Structured</b>	Transforms unstructured data to formats needed for investment decision models.
<b>Map to Internal Data</b>	Leverages internal sources of data for standardization (internal IDs/codes, security masters, LP lists).
<b>Easy-to-Use UI</b>	Enables rapid human-in-the-loop review and validation from an intuitive UI.
<b>Immediately Actionable</b>	Create alerts and notifications for time-sensitive data, routing for action where needed.
<b>Auditability</b>	Preserves data lineage, allowing users to trace source or origin.
<b>Enterprise Integrations</b>	Integrates with any source or downstream system using Alkymi's out-of-the-box API.

<b>100%</b> All data traceable to source documents	<b>98%</b> Faster than manual processing
<b>21+</b> File formats supported, and always adding more	<b>1</b> Workflow for all your document automation

*Alkymi delivers the automation necessary for operational success and empowers control and governance over the data that ultimately forms a valuable analytical tool in alpha generation.*
