

# Accelerate investment performance reporting and data collection

Your clients expect investment performance reporting that matches the speed of the market. With FSI-specific automated data extraction capabilities, Alkymi Data Inbox enables investment professionals to eliminate time-intensive data collection and build a central repository of real-time, auditable data to improve client reporting and investment decision-making.

## Unlock reporting processes and unlock critical insights.

Supercharge your reporting with instantly available, process-ready data and share insights with clients faster.

## Free expert time while upgrading client experience

Remove report delays that negatively impact the client experience and save valuable analyst time for analysis and client service.

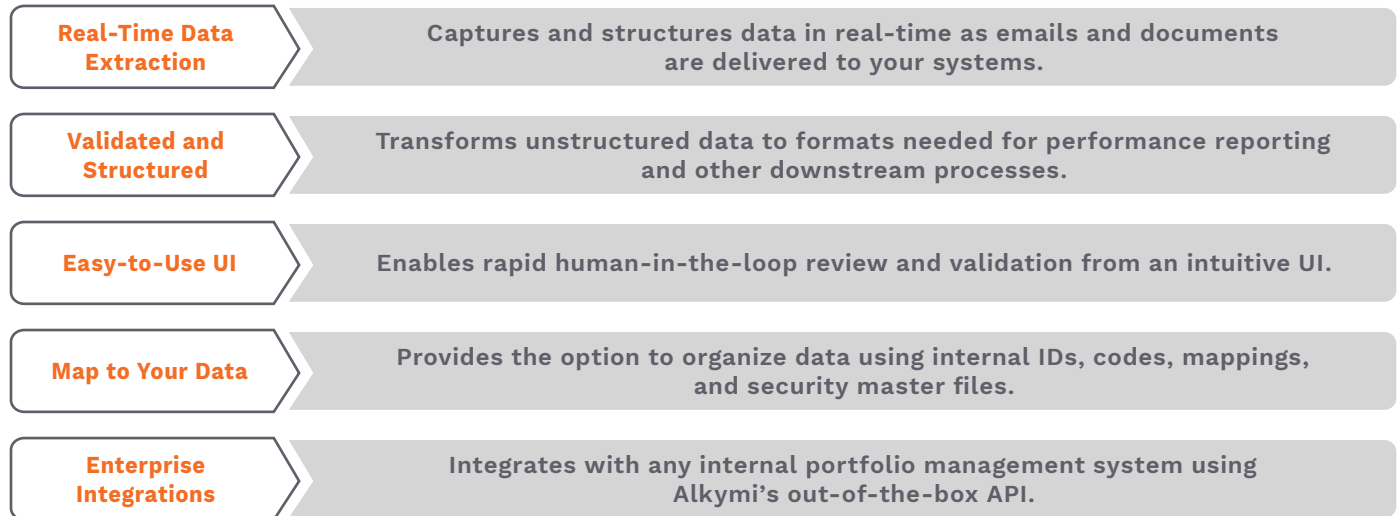

## Reduce compliance and operations risk with accurate, transparent data

Prevent data extraction errors and data-driven compliance risks. Trace data back to individual fund managers and data sources for auditability.

## Alkymi Data Inbox: Key Features

Data Inbox combines financial services expertise, real-time data extraction, and human-in-the-loop in an enterprise-ready product.

# 100%
