

## Modern Endpoint Management Workshop – Focus on Mobile Devices

Mobile devices are valuable tools for businesses. They give employees instant access to your internal content and resources. However, given the variety of mobile platforms, operating systems and versions organizations encounter difficulties managing a high number of devices. Then there's purpose-built smartphone sleds and semi- and fully ruggedized devices. What you need is a centralized and simplified management infrastructure to increase visibility and – most importantly – security. In this workshop, our experts will help you with insights and best practices they have gained over the last 20 years. Benefit from our broad experience across multiple industries to learn what really works and what's just talk.

### What's this about?

With the power that Workspace ONE brings to your organization, it's easy to lose track of what is important, or how you should get started.

### Insights

With visibility into your entire environment in one place you can quickly make the right decisions.

Keep an eye on the data that matters to you most with preset dashboards that can be customized in infinite ways – we will give you best practice advice what promises the most telling data for your specific use case.

### Analytics

Quickly resolve issues that can negatively impact user experience and prioritize development efforts based on user impact. We will for example help you to discover the apps that are used the most and what settings you should make in order to ensure best performance.

### Automation

Automate processes to increase security hygiene across your environment, meet compliance requirements and increase employee productivity. We will help you to automate processes by defining rules that take actions based on a set of parameters. So we can create policies that take automated remediation actions based on context to increase security and compliance.

### Products included in this offering

- VMware Workspace ONE
- VMware Workspace ONE UEM
- VMware Workspace ONE ACCESS

### High level project timeline

- 2 days

### High level services

- Analysis of the current situation and agreement of workshop focus

## More information

For more information on VMware Workspace ONE visit: [www.comdivision.com/cd-products/vmware-workspace-one](http://www.comdivision.com/cd-products/vmware-workspace-one)

"The comdivision group – founded in 1996 – provides outcome-oriented IT strategy consulting and implementation support in the DACH region and the USA. The comdivision group was the first partner in EMEA to achieve five VMware Master Service Competencies and second worldwide to earn all seven. Most of the architecture and consulting team – including two VMware Certified Design Experts (VCDX) – are also VMware Certified Instructors (VCI), so you have the peace of mind to be taken along through each step of the way, preparing you for successful Day 2 operations. If you need assistance beyond that, ask for our cd:knowledge product, an expert-on-demand service that gives you up to 24/7 access to our specialists."
