

VMware Cloud Foundation (VCF) Deployment

VMware Cloud Foundation allows your enterprise to operate a true software defined cloud platform, ready for the hybrid and multi cloud world. It is built on VMware's software defined stack (HCI, network etc.) and allows a consistent use of infrastructure service whether they are on-premises or in the cloud, whether they are operated internally, or by a third party like VMware, Dell or others.

Why/Outcome

While VCF allows you to standardize your platform, the initial design and deployment can be challenging. Our senior solution architect will help you to overcome any challenges in the design phase, identify the correct deployment platform, services and path to a successful VCF deployment and usage.

What

comdivision will help design and validate the actual VCF deployment including configuration sheets and prerequisite analysis. It will support the actual deployment and provide a knowledge transfer for normal operations procedures. Optional additional product training/knowledge transfer can be added

Products aligned with this engagement

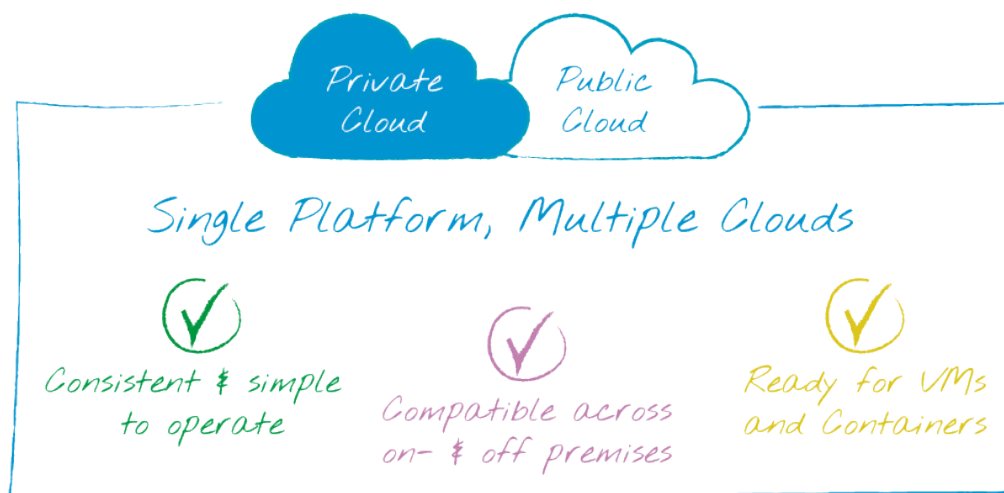

- VMware Cloud Foundation (incl. the complete VMware SDDC stack)

High level project timeline

- 3-6 weeks end-to-end, split in several 1-4 day engagements

Tasks included in this engagement

- Design and documentation of the VCF deployment
- Configuration of the VCF deployment
- Actual VCF deployment for up to 16 nodes
- Knowledge transfer on VCF operations

Project Timeline

After an initial kickoff workshop, multiple design workshops will be conducted to align the VCF deployment with your business and technical requirements. The deployment of VCF that follows, is based on requirements and a knowledge transfer workshop for daily operations.

Prerequisites

- VCF target hardware platform is required, that is aligned with VMware prerequisites and compatibility matrix.
- Hardware should be physically installed, cabled and documented.
- VCF and other software licenses required.

More information

For more information on VMware Cloud Foundation visit: www.comdivision.com/cd-products/vmware-cloud-foundation

“The comdivision group – founded in 1996 – provides outcome-oriented IT strategy consulting and implementation support in the DACH region and the USA. The comdivision group was the first partner in EMEA to achieve five VMware Master Service Competencies and second worldwide to earn all seven. Most of the architecture and consulting team – including two VMware Certified Design Experts (VCDX) – are also VMware Certified Instructors (VCI), so you have the peace of mind to be taken along through each step of the way, preparing you for successful Day 2 operations. If you need assistance beyond that, ask for our cd:knowledge product, an expert-on-demand service that gives you up to 24/7 access to our specialists.”
