CAMOR

Risk & Security Solutions

CAMOR Ltd are a specialist security company specialising in asset (both physical and people) and infrastructure protection. With our team of security experts, all of whom come from a UK Counter Terrorism background, we offer risk and security solutions that are threat informed, vulnerability focused, and impact driven. We are a recognised training provider by the Civil Aviation Authority (CAA) and are a **Scottish Qualifications Authority (SQA) approved training centre**. We offer academic qualifications and learning courses that are state of the art, digital, interactive and current.

Simulated Exercises, Tabletop and Liveplay

Tabletop exercises are facilitated discussion sessions where team members meet in an informal virtual or classroom setting to discuss and evaluate individual's roles, test plans and responses during an emergency to establish their effectiveness. Managing crises and crisis communications is an essential element of all organisational responses. Exercises, linked to expert consultancy help test and develop security and safety planning and processes.

CAMOR have been involved in conceptualising, developing and creating a variety of Table-Top exercises in a wide range of subject matter areas, these include:

- **Emergency Response**
- **Insider Risk**
- **Firearms and Weapons Attack**
- **Terrorist Attacks**
- **Business Continuity**
- **Incident Response**

CAMOR's Approach to Exercising

'Atychiphobia' - the fear of failure.

However, failure is good in the correct setting. Too many individuals are afraid of failure or a less than satisfactory performance during testing and readiness exercises.

At CAMOR Ltd we believe that narrative should be reframed. We recognise that exercising is not training but an evaluation of the training previously received by the individual or group. We work with our clients to focus on the experiential learning that can be gained from exercising effectively and immersing individuals in dynamic situations which are safe, to test specific skills or abilities under controlled conditions.

Staff do not fail during testing and exercising, they develop an understanding of what it takes to make a defensible decision, or manage and lead during a crisis, or operate effectively within the confines of a business continuity plan.

Working with clients we will determine basic scenarios, aims and objectives and discuss the best and most effective exercise types to achieve your individual requirements.

- **Seminar or workshop exercises**
- **Tabletop or desktop exercises**
- **Control post exercises**
- **Module exercises**

Benefits

Tests staff regarding application of training they have received.

Prepares individuals and organisations for unexpected or unanticipated crises (far better to fail in a simulated exercise than in a real unfolding crisis).

Allows process, procedures and places to be tested in the cold light of day e.g evacuation plans, bomb/firearms response plans management.

Allows staff members to work with others in a 'safe' environment and allows them to get to know each other face to face rather than by digital means.

Trains leaders to 'lead'.

Instills a baseline confidence in crisis response, enhancing defensible decision making.

Effective testing and readiness exercises are essential in today's business environment. Be it emergency response or managing business continuity, we will work with you to deliver cost effective benefits leading to a cycle of continuous improvement in your organisation.
