british aviation group

CAMOR Ltd are a specialist security company specialising in asset (both physical and people) and infrastructure protection. With our team of security experts, all of whom come from a UK Counter Terrorism background, we offer risk and security solutions that are threat informed, vulnerability focused, and impact driven. We are a recognised training provider by the Civil Aviation Authority (CAA) and are a **Scottish Qualifications Authority (SQA) approved training centre.** We offer academic qualifications and learning courses that are state of the art, digital, interactive and current.

E-Learning- Online Security Training

CAMOR have developed a range of interactive online training products to engage and educate participants through the power of technology. All digital courses can be accessed on phones, tablets and computers to aid accessibility and can be hosted on LMS's to track and collect learner data. Our subject matter experts have collaborated with leading designers to revolutionise security training and find creative solutions to communicate vital information-ensuring learners extract the maximum from our training. At CAMOR we look to the future and understand the importance of **gamification, interactivity,** and **immersive learning** in aiding retention, enjoyment and motivation through out the learning process -our plethora of pioneering digital security training solutions are a testimony to this.

## GSAT - General Security Awareness Training
Online Integrated Training Solution with Mobile Companion App & Bespoke LMS

General Security Awareness Training (GSAT) is mandated for staff working in the aviation industry and must be completed as a regulatory requirement. CAMOR has engaged with industry partners to design a learning process delivered through an immersive online training platform, which provides visualisation and interaction for different scenarios and incidents using computer Gamification technology. This allows individuals to consider and practice decision-making processes, responses and actions, utilising real-world visualisations and experience of operational scenarios/incidents. Our GSAT training app, companion app and Learning management System (LMS) work together to give you the tools to track training profiles across a workforce, & provide instant updates to staff on security incidents and threats. The portable training 'companion' APP; is accessible on any mobile device and will support and reinforce training with 'aide memoirs and checklist' and advice at any 'moment of need'. This includes push notifications to alert staff of **'routine'**, **'be aware'** or **'urgent'** issues.

In addition to the core syllabus, we have added a section on the existing threat from an Insider, identified as a key area of risk to the Aviation Sector by both the Joint Terrorist Analysis Centre (JTAC) and DfT, who have mandated under the National Aviation Security Programme (NASP), a requirement <u>from 1 January 2022,</u> to have a security programme to include appropriate policy/training to enhance staff awareness of insider risk.

Insider Risk Online Course for Aviation (Approx 45 Minutes)
Interactive, Auditable, Online Training

Product Trailer: https://www.youtube.com/watch?v=LYB_sAyAqao

CAMOR has teamed up with one of the UK's leading online training developers to develop an online training course on Insider Risk, for all staff within the aviation sector. The course is assessable and is 'state of the art', requiring active participation by the 'learner'. It has been designed to embrace advanced and evolving learning technology. Much of the learning is provided through the examination of case studies and scenario-based learning. At the conclusion of the course, all participants should be aware of the basics in relation to insider risk mitigation and what their role is to combat this threat. Both malicious and Non-Malicious Insider activity is considered within the course content.

BENEFITS OF INSIDER TRAINING

- Business protection from reputational, organisational and financial damage
- Employee protection from Insider incidents
- 'Insider aware' workforces providing extra security coverage
- Effective strategies in response to Insider activity
- Understanding of how to identify and support vulnerable employees as a means of threat mitigation

CAMOR's online interactive training is accessible on all devices. The course can be uploaded with ease to any LMS allowing learner data to be tracked and audited. The design elements, which include engaging graphics, narration, videos, animations, interactivity and concept checking ensure the learner is engaged and having fun through out.

CAMOR
Risk & Security Solutions

General Employee Vulnerability and Insider Risk (Approx 40 Minutes)
Interactive Online Training

E-LEARNING

This online course has been developed to upskill staff within an organisation to recognise and understand insider activity, and what is expected of them when they detect or encounter such activity. It can be undertaken by staff at their own pace, whilst within the workplace. The risk from insider activity, or the exploitation of vulnerable employees, is possible within any sector or organisation. Understanding what constitutes employee vulnerability and Insider Risk within your organisation, is paramount in protecting it from physical, financial and reputational damage. Awareness training in what motivates an Insider, the methods of attack, and behavioural indicators enables an organisation to develop an understanding of the risk, consequences and mitigation activity.

Protect Duty - Counter Terrorism Training (Approx 1 hour)
Interactive Online Training

E-LEARNING

This online course has been developed for staff, supervisors and managers, to upskill them in the basic responses expected to terrorist or other forms of attack. It can be undertaken by staff at their own pace, whilst within the workplace, and provides them with an awareness of the current terrorist threat and what form this can take. It also provides an outline of the actions which should be taken by staff prior to, and in the event of a terrorist attack, including responding to the threat from suspicious packages, IED and weapons attacks. The training examines what constitute suspicious behaviour and hostile reconnaissance and how this activity would be conducted prior to a terrorist attack. Other key subjects covered include the role of effective communications and issues which should be considered when considering evacuation of premises.

Cyber Hygiene Course For Remote Working (Approx 40 Minutes)
Interactive Online Training

E-LEARNING

Product Trailer: https://www.youtube.com/watch?v=t3LMcXHRp2A

This course from CAMOR is designed because of the speed which employees and employers have moved to remote working. You only have to read the news each day to find a new data breach, hack or threat from a malicious group. Following good 'cyber hygiene' will keep both you, and your organisation, safer from online, and offline, threats. This short online course will show you best practice for remote working, meaning that you will be working smarter. The course is not intended to slow you down, or to put unnecessary barriers in your way, all its guidance is aligned to best practice issued by the UK's National Cyber Security Centre (Part of GCHQ) and is complied by experienced cyber security professionals.
