chenille

Technically advanced upholstery fabrics made of chenille fibres consisting of two simple twisted together threads between which cut fibres are placed. Owing to that a fabric has the structure similar to that of velour or plush. A feature that is typical for chenille is irregularity of upper structure, tiny irregular clearances and downiness.

* **Easy to clean** Easy stain removal by rubbing with damp cloth and neutral soapy water.

Durable A fabric is developed using the most appropriate materials and processes in order to produce upholstery that remains in mint condition over time.

Eco friendly Part of the material is biodegradable, recyclable and provides antibacterial, antistatic and anti-allergenic properties.

The waste created during weaving process is recycled, energy and water consumption is minimised and no toxic products are used.

Washable according to graphic instruction above.

Fabric you can **clean** with **just water.**

Enjoy the everyday comfort provided by Aquaclean® Technology. Now you can get rid of small stains such as wine, coffee and food without having to wash with soap or detergent. Aquaclean® Technology is so effective that even stains from most marker pens comes off with just water!

Regular maintenance instructions.

For normal sofa maintenance we recommend that you vacuum the entire surface area regularly. You can use a normal home vacuum cleaner with a brush fitting.

Water cleaning in three simple steps:

Remove any excess residue on the upholstery by careful scraping of the stain surface. (Make sure not to use a sharp object to prevent ripping the fabric).

Apply water over the stain, either directly or using a damp cloth. Wait a few seconds.

Press down over the stain with a damp cloth and rub gently over the fabric in circular movements. If the stain does not come off completely, repeat the process as required.
