

BETA[®]

*Solving Your High Voltage
Power Delivery Challenges*

At Beta Engineering, we understand how much of a headache project execution can be with limited resources. You deserve a proven team that will deliver your project built to your specifications on budget and on time.

Find out how you can achieve your project goals with our substation and transmission solutions.

Conventional EPC

Facing limited resources or a complex project? Our team of experts works with you to engineer, procure, and construct a solution that looks and performs exactly as you expect.

Dealing with short time frames and tight budgets? This innovative design-build approach leverages Factory-Built Substations to fast-track construction and reduce cost.

Engineering Services

Needing high voltage engineering expertise? Our team of engineering experts provides quality high voltage designs according to your standards and specifications.

GIS

EPC of an underground 69/12kV GIS substation and park in California

Factory-Built Projects

Agile EPC of a 230/34.5kV Factory-Built Substation in Georgia

Transmission Lines

EPC of a 138kV overhead & underground transmission line and 138/69/12kV substation in California

Substations

EPC of a 500/230kV substation in California

FACTS

EPC of a flexible AC transmission system (FACTS) involving two 300 MVAR 138/15kV static VAR compensators in Illinois

Switchyards

Agile EPC of a 138kV Factory-Built Switchyard and 138kV transmission line in Texas

Experience You Can Trust

Helping our customers turn challenges into success since 1975

Let's Talk

Need input on your design, exploring your options, or ready to request a proposal? Wherever you are in your project journey, we are here to help.

Celebrate a project that looks and performs just the way you want.

How much are budget overruns and delayed schedules costing you?

With Beta, you can enjoy the peace of mind that comes from working with an expert team. We draw on decades of experience, keep our word, and have the record to prove it. **In the past two decades, more than 75% of our projects have been performed for repeat customers.**

Licensed PEs in the 48 contiguous states

D&B rating: 4A3

Bonding capacity: \$1 billion

EMR: 2021: 0.61 2020: 0.62 2019: 0.76

We take your vision, engineer a solution and build it together.
