

High-Frequency indicators data package

Includes feedable and Macrobond base package time series only

Make timely investment decisions using real-time proxies to offer a more accurate representation of the world.

High-frequency indicators enable you to switch from an intrinsically lagged publication to produce your own nowcasted representation of an economic concept.

Access 6.8m daily and weekly time series across various themes such as:

Job retention scheme

Online job ads

Election polls

Google mobility data

OpenTable data

Covid trackers

Air quality data

Heating degree days

Traffic, congestion index
