We're on a mission to create
a safer, smarter physical world
with the power of sight.

Join the thousands of locations —
from local businesses to Fortune 500s
— using Spot AI.

Our AI Camera System is built for scale, with powerful edge computing, seamless integrations, and an intuitive dashboard accessible from anywhere.

Intelligent Video Recorder (IVR)

Powerful on-edge AI processing built with the latest NVIDIA GPUs. Gain 24/7 local storage with all the benefits of the cloud.

Dashboard

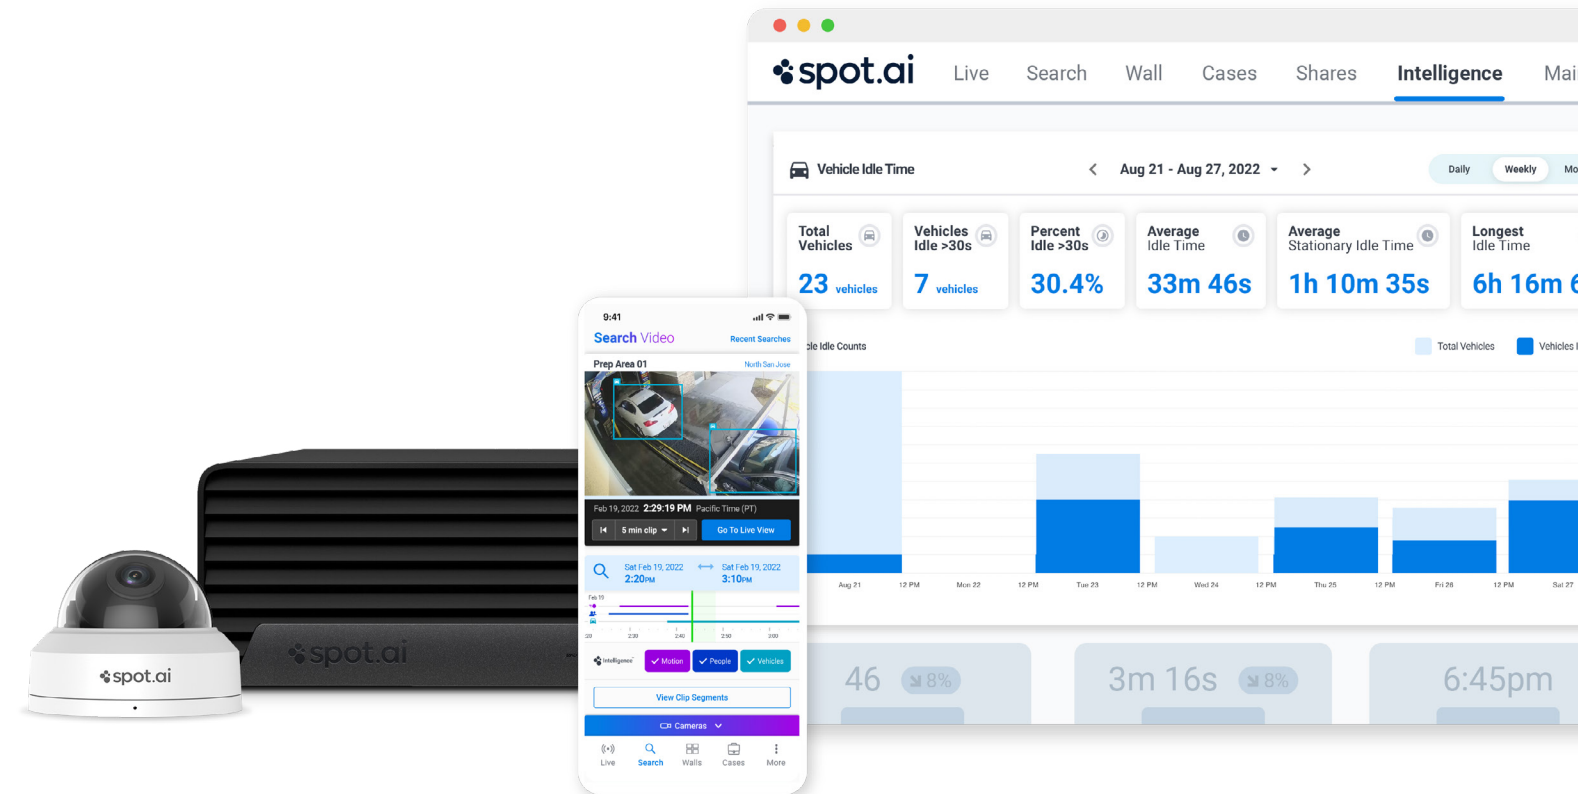

Modern software that allows you to view all of your locations in one place. Turn insights into actions from any desktop or mobile device.

Cameras

Premium, high-resolution, NDAA-compliant IP cameras at no cost to you. If you want to keep your current cameras, you can.

Integrations

Seamless integrations with industry-leading access control, environmental sensors, and POS systems.

Edge computing delivers AI without the drawbacks

Superior reliability

Fault-tolerant infrastructure ensures that your system still records video during network outages, outperforming traditional cloud systems.

Zero Trust security

Secured access for your organization that requires all users to continuously be validated and authorized.

Bandwidth-friendly

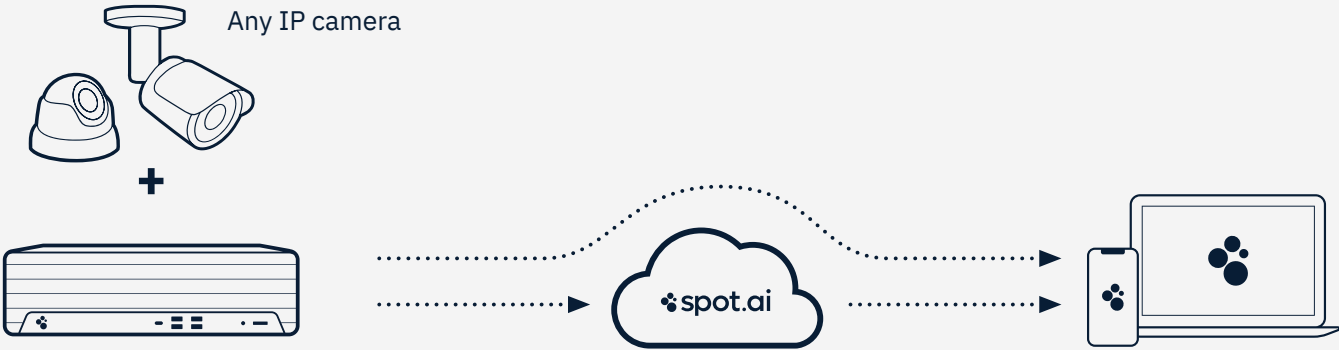

Video is transmitted using adaptive bitrate technology to optimize bandwidth consumption.

Easier setup and less maintenance

Turnkey system that finds all cameras on your network in minutes and monitors camera health.

Infinite scale

Elastically scalable to any number of cameras and locations without worrying about complex configuration.

Power of the edge

- Plug and play: auto-connect to any IP camera
- 24/7 continuous, local recording
- Powerful AI on high-resolution video

Convenience of the cloud

- Scale to infinite locations, users, cameras
- Infinite cloud backup for saved clips
- Automatic software updates

On one dashboard, from anywhere

- Built-in Zero Trust security for secure access and use
- Robust Role Based Access Control with AD + SAML tie-ins
- Full video delivery and network observability

Meet the Intelligent Video Recorder (IVR)

How the IVR works

- On-edge AI processing with the latest NVIDIA GPUs and Intel processors
- Ingest, index, secure, and store video locally
- Plug-and-play with any network configuration
- Configurable to any number of cameras at a location

Surface and resolve incidents faster with integrations

Link your physical systems to your existing cameras.
Works with access control, environmental sensors and POS systems.

Instantly find video with automatic, event-based triggers.
Find the right clips linked to entries, transactions or alerts without manually matching timestamps.

Securely access your camera systems with SSO integration.
Seamlessly assign camera access and feature permissions when onboarding or offboarding employees.

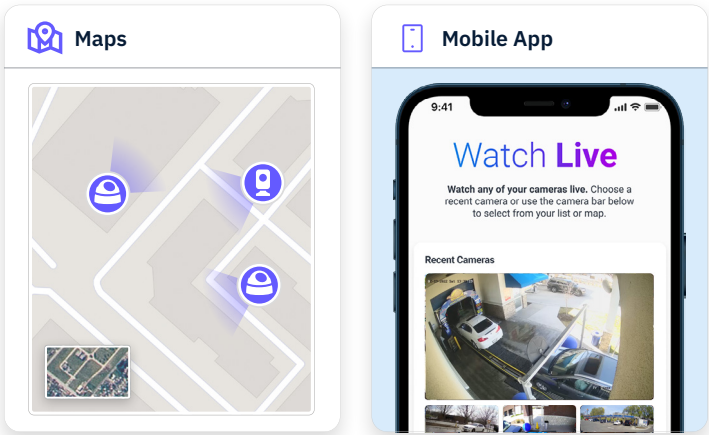

FOR IT TEAMS

Improve visibility across locations, easily maintain and scale your system

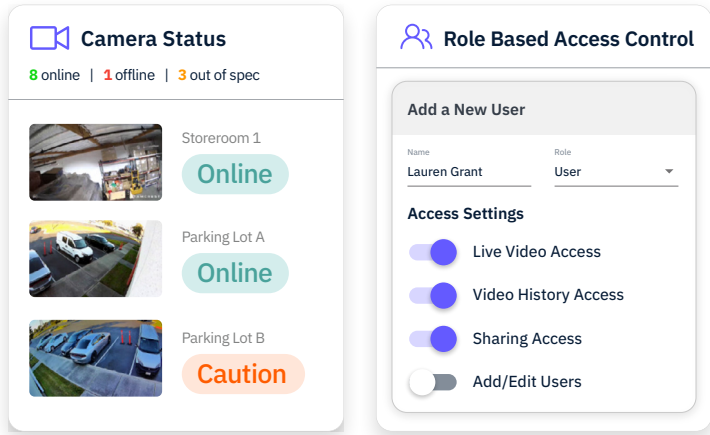

Unify your locations on one dashboard

- Works with any IP camera in a 10-minute plug-and-play setup so you can instantly deploy modern technology without a cumbersome project.
- Bandwidth-friendly 24/7 local storage with built-in cloud backup to modernize obsolete systems without infrastructure overhaul.
- Securely access from anywhere on desktop or mobile app to always stay on top of key areas of your business.

Maintain and scale cameras with ease

- Add and manage users at scale with intuitive Role Based Access Control.
- Scale to any number of cameras and locations without worrying about outgrowing your hardware.
- Automatic software updates and system health alerts so you can stay on top of your system with minimal effort.
- Get world-class technical support and a dedicated account manager as a partner in your success.

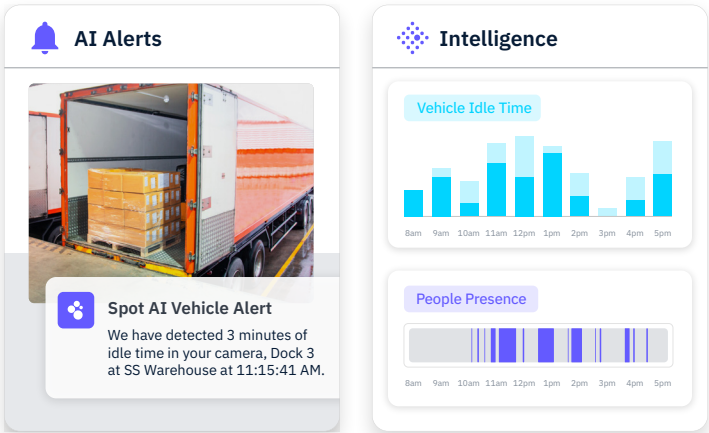

FOR OPERATIONS TEAMS

Drive better operations across your organization

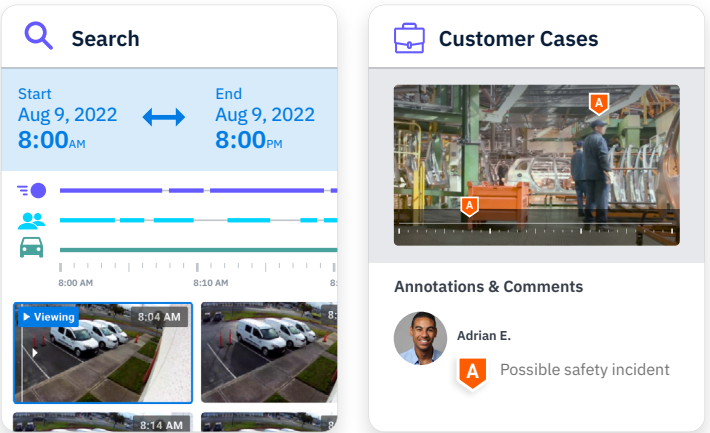

Unlock efficiencies and increase throughput

- Advanced AI alerts for unstaffed lines and areas, potential safety incidents and more to proactively resolve issues and bottlenecks.
- Automated metrics tracking and comparisons across locations to get a deeper understanding of your operations and make informed long-term decisions.

Search and resolve in minutes

- AI-powered search to diagnose and solve incidents in minutes, even with minimal context.
- Collaborate and annotate video footage with anyone from one dashboard to quickly resolve issues.
