elite

Let's get started!

What is Axiom Elite?

Axiom is the bridge that streamlines communication between third party data sources (CRMs, Applications, Course Registration systems etc.) and your internal Student Information System. By automating your admissions process, your staff can focus more on what matters, the students.

Axiom Elite is an ETVL tool.

(Extract Transform Verify and Load)

By adding an additional phase to the workflow “Verify” allows Axiom Elite to reconcile possible duplicate records, merge incoming records, and follow complex business logic. This allows Axiom Elite to be tailored to fit your process.

This innovative Extract, Transform & Load Tool:

- Collects and validates data
- Uploads the data directly into your centralized database (such as Ellucian Banner® Colleague® PowerCampus®)
- Offers two-way communication between your Student Information System and third party software
- Offers an end user record verification tool to prevent erroneous data
- Prevents duplicate records with robust matching algorithms

Why Axiom?

Why Axiom?

Axiom is built just for you.

Software should fit the way you work, not the other way around. After all, every school handles data differently. Take data matching, as an example. One school might use email addresses for matching criteria, while another school physical address. Axiom is easily adjustable.

Process Improvement at the University of New Hampshire

The University of New Hampshire (UNH) installed Axiom in its Undergraduate Admissions Office, which accepts more than 3,100 new students each year. The results were incredible:

- Annual software maintenance charges dropped by nearly 75%.
- Processing speeds increased dramatically, with 500 applications pushed in 2 hours instead of 8.

UNH's Bob Dorval, Systems Integration & Information Technologist, says that Axiom improved "the way the office integrates, retains, accesses, shares, analyzes, and processes its critical information. In addition ... synergies were gained, since the baseline Axiom product is already being used by the UNH Financial Aid Office."

What else can Axiom do?

Axiom **Elite** has two-way communication. So, not only can it transfer data from third party products into your system, but it also moves information from your system to third party products.

Axiom **Elite** is web-based, so you can access it anytime, from anywhere on your school's network.

Axiom **Elite** can integrate with any centralized information system. Whether you use Banner®, Colleague®, or another system, you can use Axiom Elite. And if you upgrade or switch to a different system, Axiom Elite comes right along with you.

Who can use Axiom?

Areas Axiom Elite is commonly used

Axiom integrates with a wide range of applications and third-party sources. These are some of the departments Axiom can transform. Continue on for more information.

IT: We work with you.

You have an entire university infrastructure to think about. Student data- especially data validation issues, duplicates, and managing process should not consume all your time. Let us help. Our team will install Axiom Elite and help get the process under control, so that you can focus your resources where they're needed most.

Here's what you'll love about Axiom:

- Limited need for IT involvement in implementation and ongoing maintenance
- Managed implementation
- Ongoing support for updates, and field changes
- User-friendly system that allows users to be self sufficient, and additional training on request
- Continued compatibility and functionality with database upgrades
- Integration with APIs
- Images automatically inserted into imaging system
