

XSENSOR

Intelligent Dynamic Sensing

Intermediate Full Stack Developer (JavaScript, React, Node, MongoDB)

About XSENSOR Technology Corporation

XSENSOR is the leader in Intelligent Dynamic Sensing. Creating excellent products and satisfied customers is our top priority. For over 20 years, we have delivered innovative products that use pressure imaging technology to improve the comfort, safety and performance of surfaces. Superior products ensure XSENSOR is continually identified as the leader in the markets we serve, including the human performance, automotive, health care, biomechanics and sleep industries. xsensor.com

Job Description

We are looking for a hard-working and motivated Full Stack Developer to work on our newest products involving IoT, Machine Learning Human Performance and platform development in the Cloud.

You will work as part of an interdisciplinary team to create our next generation of products and technologies. You will be primarily responsible for designing, developing, testing, implementing and supporting web-based software products. You will be a contributing member of a growing Software Development group.

Our ideal candidate is someone who is based in Calgary and has worked on at least 1 or 2 commercial products and has between 2-5 years of experience. This person will have the chance to take part in every stage of the software development cycle, contribute their ideas, and make a real impact.

Responsibilities

- Implement new features and enhancements using JavaScript, React, Node and MongoDB
- Take the lead on the design and implementation of specific features, and own it from start to finish
- Create, maintain, and enhance features that deliver cutting edge IoT analytics and visualization experiences - think of your favorite app for tracking, visualizing and analyzing health data
- Work within a core team of 4-5 developers, with frequent collaboration with other groups and departments

We thank all applicants for their interest in XSENSOR; however only those selected for interviews will be contacted.

XSENSOR

Intelligent Dynamic Sensing
