XSENSOR

Intelligent Dynamic Sensing

Position Description – Product Manager

Location: Calgary (Onsite)

Posting Date: November 24, 2021

About XSENSOR Technology Corporation

XSENSOR is the leader in Intelligent Dynamic Sensing. XSENSOR enables product designers, clinicians, sports industry professionals, and consumers to achieve the highest levels of comfort, safety, and performance. For 25 years, XSENSOR has set the standard for accurate sensors and image quality in software — to capture, visualize, and analyze pressure data.

Job Description

As a Product Manager at XSENSOR you will be responsible for delivering compelling products and features incorporating our industry leading Intelligent Dynamic Sensing technology. Reporting to the VP Product, you will work with the development, commercial and marketing teams to establish a roadmap that aligns with customer needs and drives our product vision.

Responsibilities

- Developing and maintaining a product/feature roadmap
- Collecting user, business and technical requirements for current and future product development for software, hardware and sensors
- Owning and managing all stages of the product's lifecycle, ensuring that deliverables are understood and releases are delivered on time
- Bringing an evidence/data driven approach to decision making
- Establishing metrics and goals to measure the success of the product
- Creating detailed user stories with thorough acceptance criteria
- Supporting the development team and UX designer(s) while guiding requirements through the development lifecycle
- Collaborating with teams throughout the organization to ensure your product's success
- Engaging customers, prospects and advisors for product input, design reviews and validation
- Performing product risk analysis
- Guiding the development of appropriate software test plans
- Developing expert knowledge of XSENSOR's markets and competitive solutions
- Supporting marketing in the development of product launch activities, marketing materials, and user guides

We thank all applicants for their interest in XSENSOR; however only those selected for interviews will be contacted.

XSENSOR

Intelligent Dynamic Sensing

Work Experience and Skills

- 5+ years product management experience within a similar role
- An eye for user experience design and the ability to empathize with users and to translate various user and market data points into specific product requirements
- Excellent written and verbal communication skills, including ability to influence decision makers across functions and tailoring information for different audiences
- Demonstrated organizational skills, attentive to detail and multitasking
- Experience in healthcare and/or integrated hardware/software solutions preferred

Education

- Undergraduate degree in Health, Business, Engineering or a related field

Personal Characteristics

- Team player, resourceful and adaptable
- Demonstrated initiative and positive attitude, with the ability to work independently
- Sense of quality and thoroughness to get the job done right; detail-oriented
