

New York State  
**Deferred Compensation Plan**

*A Plan for Your Future*

I miss visiting with you at your work location and/or talking with you over the phone!

However, in order to be available to you during this time of social distancing/work from home, I can schedule phone appointments and virtual meetings through our online appointment system.

Using this system, you can schedule a return phone call from me on a specific date and time. You can also request a virtual meeting that allows us to share visual content, provide web site walkthroughs, as well as other features that are not available during a traditional phone call.

I am happy to help with any questions about your account, including contribution changes, your existing investment strategy, beneficiary updates (is yours current?) and other Plan options. I can also help with questions you may have if you are nearing retirement or separating from service.
