

NETKAMU

It generates professional solutions for all work steps required to realize expropriation projects. It is a Netcad product that can perform all procedure steps in expropriation projects of road, channel, dam, pond and power transmission line and follows the current legislation.

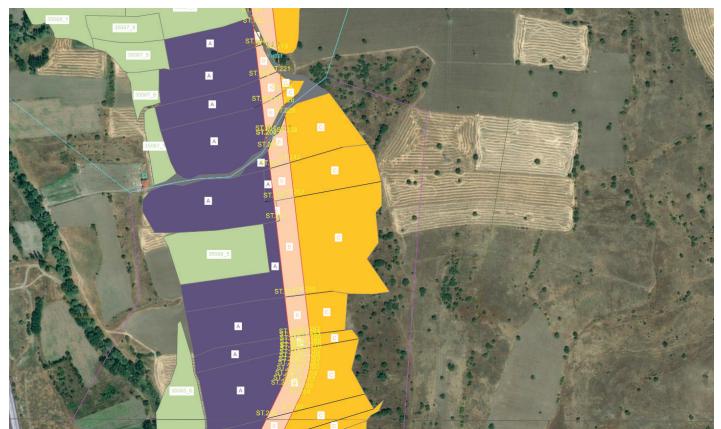

Netkamu takes into account the needs of institutions and organizations that carry out and follow expropriation projects while producing dynamic projects that comply with the legislation for their users. It has been formed in line with the usage and design recommendations of the experts in the field of expropriation.

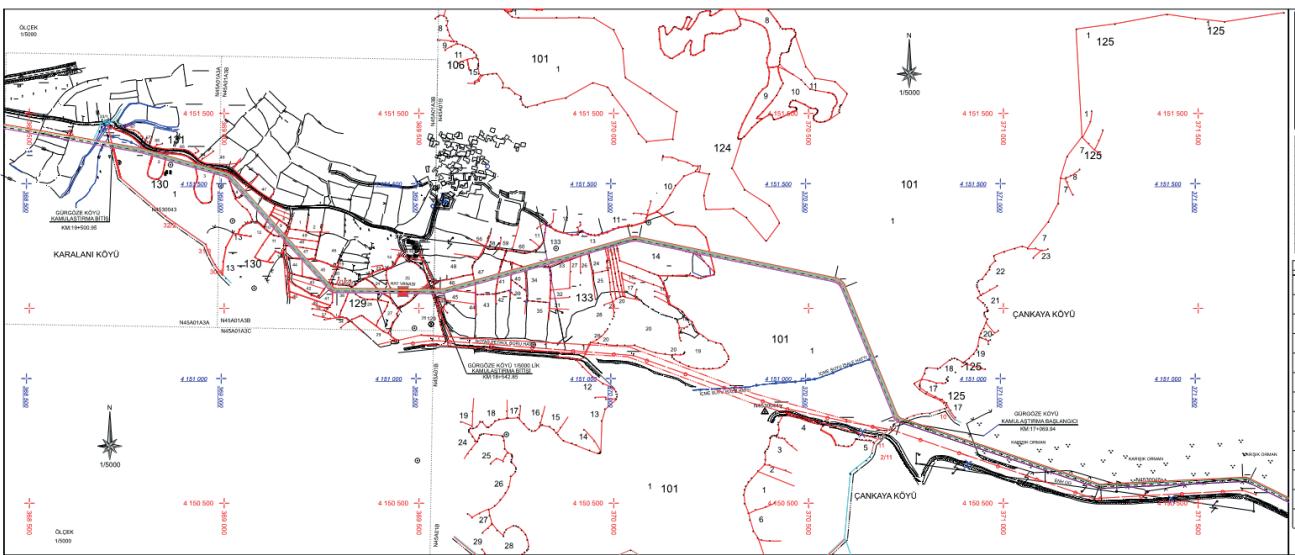

PREREQUISITES

NETKAMU is a dependent product on NETCAD GIS and NETMAP.
