

## 4-channel contact closure device

This is a 4-channel contact output device that mounts onto a DIN rail, allowing it to be mounted on a hot-swappable power and communication bus for easy installation. The device receives serial messages from Island Radar sensors and sends them on as contact closure outputs.

- 4 channels available
- Compatible with NEMA TS1 and TS2, 170, and 2070 traffic controllers
- Mounts on a DIN rail for easy connection to power and communication bus
- Fail-safe mode in case of interruption of data flow
- Dual communications ports for separate data and configuration communication
- Uses industry-standard RS-485 communications
- Automatically sets baud rate
- Solid state outputs
- Displays detection via LEDs on faceplate
- Configurable via hardware front panel interface or software
- Keyed removable screw terminals for ease of wiring
- Conformal coated
