

BOESCH SUNSKI 625

Sporty, comfortable and spacious

OVERVIEW

Optimized for sport

The Boesch Sunski 625 expertly combines comfort and driving pleasure with high performance for sport enthusiasts. This model was designed specifically for the fun of waterskiers and wakeboarders alike, with a unique ability to create optimum conditions for both. Depending on the desired speed range, the Boesch Sunski 625 is able to create a soft, flat wake for waterskiing, or a well-defined, larger wake for wakeboarders. The ski pylon is situated directly at the boat's centre of the wetted interval surface, ensuring a perfectly smooth and straight pull during the lateral swings of weight generated by a skier's movement. Extra large storage areas in the bow and on the starboard side of the engine create ample space, situated for equipment such as skis, dry and wet suits and more. An expansive 2 m x 1.25 m deck above the motor and storage area allows for luxurious enjoyment of the sun, while freedom of movement remains unrestricted via a unique port-side passage for convenient access to the large swimming platform.

Precise and functional equipment

High speeds and maneuverability; the features of the Boesch Sunski 625 seamlessly combine to define these qualities at the highest level. Uniquely positioned in front of the rounded windshield is a compactly secured cover for the Bimini-Top. The Perfect Pass Stargazer System ensures simple and precise speed control.

Boesch V-8 Power

Supreme acceleration and optimal cruising speeds are achieved effortlessly with the powerful 5.7l, V-8 petrol engine, generating an impressive 320HP. This commanding engine is complimented and refined by Boesch Horizon Gliding Technology, resulting in remarkable smoothness at high speeds and a continuously balanced trim in the water. The Boesch Sunski 625 continues the time-honoured tradition of quality and elegance truly achieved only through hand construction, while remaining in the lower price segment of the Boesch fleet.

MEASUREMENTS AND WEIGHTS

Length (hull)	6.25 m
Length (over all)	6.70 m
Beam (hull)	2.15 m
Beam (over all)	2.20 m (rubbing strake)
Draft	0.54 m
Weight	1300 kg
Load capacity	6 persons
