

MultiVIEW

Multimedia solution for
your hybrid rooms.

Multi-task, MultiVIEW.

With the SurgiMedia MultiVIEW solution, we use **our knowledge and experience** for the **interventional surgery** that is quickly expanding these days. This type of surgery requires the surgeon to **perform several tasks simultaneously** (studies, diagnosis, intervention) and thus, necessitates **speed and precision** in the **analysis of data from centralized display systems**.

Our solution is performance-guided

SurgiMedia MultiVIEW is a **global solution** which **optimizes decision-making** and **simplifies administrative tasks**.

Centralize the information

Benefit from a **large 4K screen** to **display simultaneously all the information** that you set into a **multiple windows mode** : surgical procedure, patient's data (face, heartbeat,...) and others you think are important.

Ease the procedure

With SurgiMedia MultiVIEW, the **administrative tasks linked to the patient's file** (create a new file, record and archive computing data, MRI scanner, radiology images on DICOM format) **are done within few clicks**. **Keep track of your work** easily. Let's concentrate on your core actions !

Share your intervention

In **live streaming** and **in video-conferencing**, share your interventions with your students or peers. Record them **up to 4K technology** on a **local server** or through the **network**.

1,2,3... assets !

We designed the solution as an extension of the surgeon work.

1. Efficiency

All the information you need is gathered at the same place and displayed on a 4K screen.

2. Fluidity

User-friendly, the SurgiMedia DistriVIEW solution is equipped with touch screens and easy to use icons.

3. Versatile

We co-create your multimedia environment to adapt it to your use and your medical equipment. We customize the number, the size and the position of the screens (fixed or built-in), the number and the position of the audio and video inputs and outputs ...

Why us ?

Made in France

We design and produce our solutions in Grenoble. Which mean we master them perfectly and so we can adapt them to the specific demands of our customers.

Warranty

SurgiMedia MultiVIEW solution, and the rest of our products are 2 years-warranted.

Medical Devices

SurgiMedia MultiVIEW are CE marked in order to address security and hygiene expectancies of your medical environment and ensure their compatibility with other equipment which they are connected to.

Guiding you is our priority !

We work together upon **the identification of your current and future needs !**

During the SurgiMedia installation, **Isis supervises and coordinates project teams** so that your solution is perfectly integrated in your operating room.

Strongly experienced, **Isis's teams will guide you** through the broad range of our solutions, in order **to choose the most adapted one.**

Once installed, **Isis teams will train your clinical teams** to ensure the good handle of the machine. Moreover, **Isis will support your biomedical and technical staff** in the maintenance of the products.

Your needs, our solutions

PRODUCT	DESCRIPTION	REFERENCE
MultiVIEW 4K 7-1	MATERIAL pack including a 4K digital integration bay with video processor allowing CAPTURE with routing, of Maxi. 7 signals. (4x HDMI, 2x DisplayPort, 1x RGB / YPbPr) to an OUTPUT in 4K UHD display, with PIP & PAP mixing of 4 simultaneous sources according to 16 predefined display combinations (LAYOUT). Full control via SurgiMedia 21.5 "MV-4K system only.	Réf. IS2575
MultiVIEW 4K 9-1	MATERIAL pack including a 4K integration bay with video processor allowing CAPTURE with routing of Maxi. x9 HDMI signals. to 1 OUTPUT in 4K UHD display (or 4 FullHD outputs), with PIP & PAP mixing of 8 simultaneous sources, according to 16 combinations of displays (LAYOUT) preset (* only available with the FSN FM-D5801DV DICOM monitor Ref IS 23 15). Autonomous control by individual PC on WEB page, or via the SurgiMedia 21.5 "MV-4K system or / and SmartCONTROL.	Réf. IS2363
