

VIDEO PIPE INSPECTION

Video Pipe Inspection (CCTV) is a service used to inspect underground water, sewer and lateral pipelines. VPI is a great tool for investigating cross-bores, structural faults and damages, and lateral line inspection. GPRS uses push cameras, CCTV pipe crawlers and lateral launch cameras to assist our customers in determining whether a pipe should be repaired or completely replaced.

WASTEWATER TREATMENT

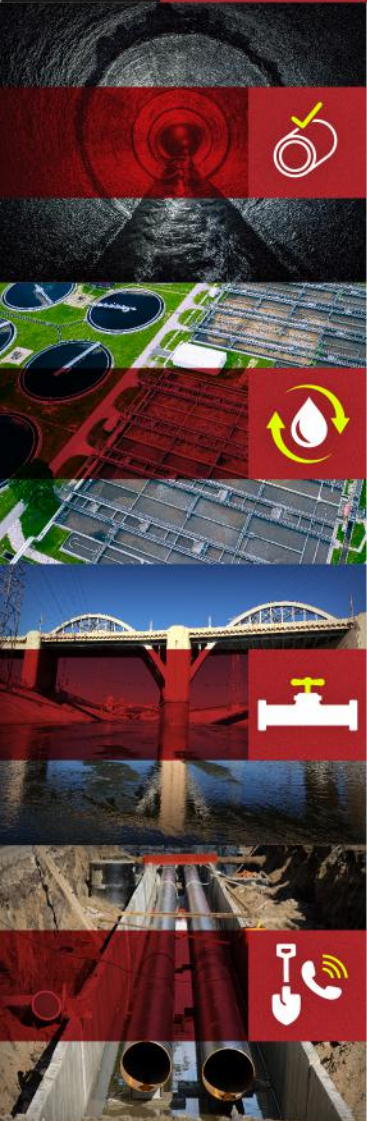

Wastewater Treatment facilities can present many challenges when excavating, drilling or saw cutting. As a critical facility, utilities and other underground assets must be protected during construction. Damage prevention can be achieved through the utilization of GPRS Utility Locating and Video Pipe Inspection Services and the usage of the SIM process.

WATER DISTRIBUTION & COLLECTION

Spanning long distances, water and sewer pipelines can have many potential utility crossings. During the installation of water and sewer pipes, underground utilities must be located. GPRS can also locate utilities prior to excavation when repairing or replacing existing water or sewer lines.

ONE-CALL SERVICES

GPRS exceeds industry performance when it comes to the accuracy of our utility locating. Our team can continue the support of your project by crafting a one-call program for when the project transitions to the O&M phase. Whether supporting locating tickets for assets on public or private property - GPRS is the clear choice for damage prevention.

- ✓ TRAINING
- ✓ EQUIPMENT
- ✓ METHODOLOGY

SIM SPEC

The use of proper training, multiple technologies and a field-tested methodology is key to a successful concrete scan or utility locate. GPRS is a master of all three components through the utilization of the SIM Specification.

SIMSPEC.ORG

REPORTS & DRAWINGS

We offer a comprehensive range of reporting options, from marks on the ground, to a basic field sketch, to a CAD report that pinpoints buried electrical, water, gas, communication, sewer, storm drain and other buried lines and infrastructure.

NASSCO

is the National Association of Sewer Service Companies. NASSCO sets industry standards for assessing, maintaining, and rehabilitating underground infrastructure. All GPRS Project Managers are NASSCO trained and certified and provide NASSCO reports for our pipe inspections.

UTILITY LOCATING

GPRS is the trusted leader for damage prevention in the water & sewer sector. Our Project Managers deliver results whether a project is in the planning and design phase, construction phase or even the operations and maintenance (O&M) phase.
