

STOP HITTING UTILITIES.

GPRS FINDS THEM.

ONE-CALL UTILITY LOCATING

GPRS' utility locating services can support a one-call program for facilities, higher education or other large campuses on private property. GPRS can also support One-Call contracts for tickets related to public utilities, pipelines, municipalities and campuses on public property ■

PRIVATE PROPERTY LOCATING

GPRS locates underground utilities where the one-call system leaves off. Utility locating on private property can be completed for residential, commercial and industrial properties ■

DRILLING & BORING CLEARANCE

GPRS will locate the vertical and horizontal position of critical utilities or USTs that could conflict with the path of your drilling or excavation. We specialize in locating utilities and USTs for Phase I or II investigations, environmental drilling, soil borings, installing monitoring wells, or remediation ■

FACILITY MAPPING

Our Deliverables Department is able to update existing or create new as-built drawings based on GPRS locate findings. Our facility maps show actual site conditions – including any variations, renovations, or unknown pipes ■

- ✓ TRAINING
- ✓ EQUIPMENT
- ✓ METHODOLOGY

The use of proper training, multiple technologies and a field-tested methodology are the key to a successful utility locate. GPRS is a master of all three components through the utilization of the SIM Specification.
