

STEPS FOR A SUCCESSFUL SAFETY WEEK

- 1** Decide what safety topics need to be addressed for your company.
- 2** Reach out to industry partners like GPRS to present on important topics.
- 3** Plan and schedule meetings in the main office and on every job site.
- 4** Begin to promote the Construction Safety Week event and topics to team members.
- 5** Invite your subcontractors to attend the different presentations and meetings.
- 6** Use social media to highlight the week and everyone who participated in promoting construction safety.

**CONSTRUCTION
SAFETY WEEK**

STRONG VOICES. SAFE CHOICES.

The construction industry is built on safety. The projects we proudly construct and design, the teams we work alongside, and the companies we work for are all built on safety. From the moment we step onto a job, it is the cornerstone of everything we do.

Safety is a value and common belief we all share. Our families at home and work depend on it. It's up to us to understand the impact of our actions and guarantee that every decision, operation, and project is built on safety.

When you hire GPRS to locate utilities or scan concrete, you are choosing to develop your project on a good foundation. GPRS wants to partner with you and your team to increase awareness of the dangers associated with excavation, saw cutting, and core drilling.

PARTNER WITH GPRS

TOOL BOX / SAFETY MEETINGS

GPRS can partner with your job sites by hosting a toolbox talk on safe excavation and digging or safe concrete sawing or drilling practices. Our experts can mobilize to your project(s) and present at a morning stretch-and-flex or in the job trailer or construction office ■

GROUND DISTURBANCE PLANS

Allow GPRS to partner with you in developing a more robust and comprehensive ground disturbance plan. Leverage our expertise to ensure the plan is built on safety. Reduce your risk of damaging subsurface utilities, conduits, and post-tension cables ■

LUNCH & LEARNS

Your project management and safety teams are invited to participate in an educational Lunch & Learn. Topics for the presentation will include: ground disturbance best practices, coring and cutting best practices, the components of a safe utility locate, and how communication can ensure a project built on safety ■

DEMONSTRATIONS

Has your team seen what a comprehensive utility locate or concrete scan looks like? Our team of professionals can demonstrate what you should expect from your subsurface locating firm. Using the SIM specification allows GPRS to be built on safety ■

SAFETY WEEK 2023
MAY 1 - 5

MEETINGS ARE OPEN FOR THE WEEK OF MAY 1-5
