Whole Muscle Proteins

Whole muscle proteins are a staple on every menu but often take a lot of time to prep and cook. Safe Sous Vide™ whole muscle proteins can eliminate the time and effort providing the same quality as cooking from scratch. Our Whole Muscle Proteins are cooked in their own juices right in the bag, making them perfectly tender and flavourful — just reheat, and serve.

What is Safe Sous Vide™?

Safe Sous Vide™ is a breakthrough innovation in food safe, sealed environment, and cooked proteins for restaurants, consumers and commercial kitchens alike. It's a unique sealed-environment cooking process which creates the highest quality, fully-cooked proteins through exact temperature and time controls. Through the Safe Sous Vide™ process, Cardinal Meats delivers a moister, more tender, more consistent protein versus other traditional cooking methods.

Unique Product Benefits:

Labour Savings
