We only collect, use, and process such sensitive data if you voluntarily provide it to us and only for the purposes of verifying your ability to participate in an applicable event, and otherwise as instructed by the Event Organizer. Information Collected Automatically

As you navigate through and interact with our Website, We and our third-party service providers, including analytics and third-party content providers, may automatically collect certain information from you whenever you access or interact with the Service.

- **Usage Information.** Details of your visits to our Website, including which links you clicked on, content response times, location data, logs, and other similar communication data and statistics about your interactions.
- **Device Information.** Information about your computer and internet connection, including your Internet Protocol address, operating system, and browser type.

We may combine this automatically collected log information with other information we collect about you. We do this to improve services we offer you, analytics, and site functionality.

Cookies and Other Automatic Data Collection Technologies

CrowdPass and its partners use cookies or similar technologies, which store certain information on your computer and allows us to, among other things, analyze trends, administer the Website, and to gather demographic information about our user base as a whole. The technology used to collect information automatically from CrowdPass Users may include the following:

- **Cookies:** Like many websites, we and our operational partners, affiliates, analytics, and service providers use “cookies” to collect information. A cookie is a small data file that we transfer to your computer’s hard disk for record-keeping purposes. We use both persistent cookies that remain on your computer or similar device (such as to save your registration ID and login password for future logins to the Service and to track your compliance with the CrowdPass Terms of Use) and session ID cookies, which expire at the end of your browser session (for example, to enable certain features of the Service, to better understand how CrowdPass Users interact with the Service and to monitor aggregate usage by CrowdPass Users and web traffic routing on the Service). You can control the use of cookies at the individual browser level, but if you choose to disable cookies, it may limit your use of certain features or functionality of the Service.
- **Web Beacons:** We and our operational partners, affiliates, analytics, and service providers may also employ software technology known as “web beacons” and/or “tracking tags” to help us keep track of what content on our Service is effective and to serve relevant advertising to you. Web beacons are small graphics with a unique identifier that may be invisible to you, and which are used to track the online activity of Internet users. Web beacons are embedded in the web pages you review or email messages you receive. Web beacons or similar technologies may be used for a number of purposes, including, without limitation, to count visitors to our Service, to monitor how CrowdPass Users navigate the Service, to count how many emails that were sent were actually opened, or to count how many particular articles or links were actually viewed.
- **Embedded Scripts:** We and our operational partners, affiliates, analytics, and service providers may also employ software technology known as an Embedded Script. An Embedded Script is programming code that is designed to collect information about your interactions with the Service, such as the links you click on. The code is temporarily downloaded onto your computer or other device and is deactivated or deleted when you disconnect from the Service.

Information Received from Third Parties

We also may receive information about you from third parties. For example, we and our partners, affiliates and service providers may use a variety of other technologies (such as tags) that collect statistical data relating to your Website activity for security and fraud detection purposes.

Do Not Track Signal

Do Not Track (DNT) is a privacy preference that users can set in some web browsers, allowing users to opt out of tracking by websites and online services. We do not honor browser requests not to be tracked online (known as “Do Not Track”), but our cookie policy below describes how you can opt out of receiving cookies.

HIPAA

Under the Health Insurance Portability and Accountability Act of 1996 (“**HIPPA**”) covered entities (e.g. health plans, health care providers) and their business associates (a person or entity that performs certain functions or activities that involve the use or disclosure of protected health information on behalf of a covered entity) must implement additional safeguards and assurances when using and disclosing certain protected health information.

CrowdPass is neither a covered entity nor does CrowdPass process protected electronic health information on behalf of a covered entity. Therefore, CrowdPass is not subject to HIPAA. Nonetheless, CrowdPass values the safety and security of our users and their personal information.
