

# Integrated Power Module

## High Performance in a Compact Design

Scalable power solution that enables an array of electrified architectures to charge faster and drive further.

# Complex electrification, simplified

## Technical Benefits

Lear's Integrated Power Module (IPM) reduces system cost and size, improving the vehicle packaging.

Lear's Integrated Power Module is:

- Modular and scalable
- Bi-directional
- Lighter weight
- Higher efficiency

## Customized Design

- Diversity of voltage and power across all applications
- Customer ready
- Adaptable to technology roadmaps across evolving consumer needs

High performance,  
greater value

Battery Charging, DC/DC Conversion  
& High Power Distribution in one  
compact flawlessly developed  
package

MODULAR

SCALABLE

BI-DIRECTIONAL
