Introduction

Founded in 2018, Hempsana was borne out of the founders' primary mission to provide comfort from ailments, and to be a part of the healing process, by providing a natural and consistent high-quality product that is safe for consumers. This was put into practice by engineering an EU-GMP and GPP compliant facility that incorporates strict quality controls, exacting standards and extensive in-process testing. Through our wholesale and white-labelling platforms, we process, formulate and manufacture products to the global cannabis market which must meet our 'Gold Standard' for quality.

Our Products

Crude Oil Full Spectrum Oil

Our primary extraction with post-processing provides a consistent crude resin. The crude resin is packaged for wholesale distribution as bulk raw oil.

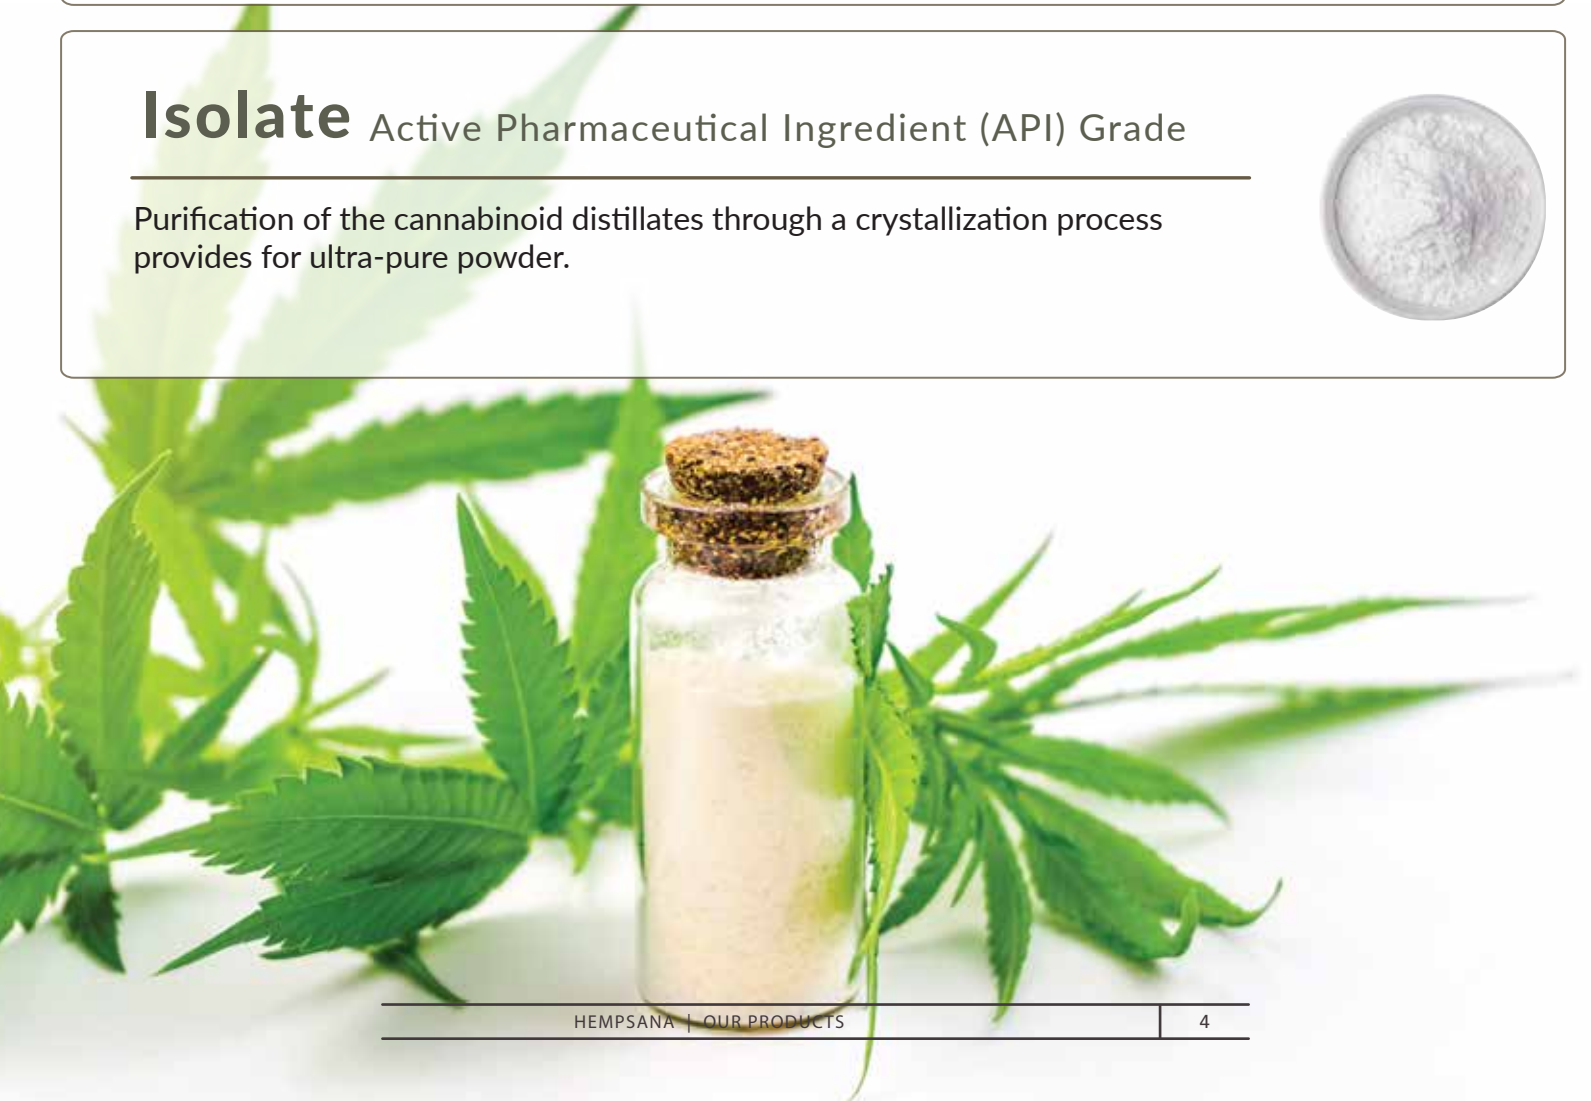

Distillate Full Spectrum High Concentrate

High quality cannabinoid distillate is produced as a purified oil.

Isolate Active Pharmaceutical Ingredient (API) Grade

Purification of the cannabinoid distillates through a crystallization process provides for ultra-pure powder.

Toll Processing

Hemp	
Crude Oil	\$50/kg of input biomass
Distillate	\$75/kg of input biomass
Isolate	\$85/kg of input biomass

Cannabis	(minimum of 200kg order)
Crude Oil	\$1.00 per gram of crude production material
Distillate	\$1.50 per gram of distillate production material
Isolate	\$2.50 per gram of isolate production material

Inventory

Type	Mass (kg)	Total CBD (%)	Total THC (%)	Other Cannabinoids	Total Cannabinoid weight (Kg)	Price/Kg of cannabinoid
Distillate (CBD)	1.832	77.755	5.418		5.418	\$2,500.00
