Moderate to high doses of alcohol cause mark impairments in higher mental functions, severely altering a person's ability to learn and remember information. Very high doses cause respiratory depression and death. Repeated use of alcohol and drugs can lead to dependence. Sudden cessation of alcohol intake is likely to produce withdrawal symptoms, including severe anxiety, tremors, hallucinations, and convulsions. Long-term consumption of large quantities of alcohol and drugs, particularly when combined with poor nutrition, can also lead to permanent damage to vital organs such as the brain and the liver.

Resources for Assistance:

All students and employees are encouraged to seek early help if they feel they have a problem with alcohol and/or other drugs, and to learn how to assist others with substance abuse problems.
