Heating & Cooling Rebates

Apply Online or Check Rebate Status [Get Started](#)

Did you know that heating and cooling energy use accounts for more than half your home's energy costs? Don't let upfront costs keep you from making your home more comfortable and energy efficient. ComEd heating and cooling rebates make it easier to invest in efficient heating and cooling equipment for your home and save on your energy costs in the process.

Qualifying equipment must be installed by a [ComEd Residential Energy Efficiency Provider \(Service Provider\)](#).

Explore rebates below:

Air Source Heat Pump

Rebate: Check with a ComEd Energy Efficiency Service Provider or your local contractor for potential discounts on Heat Pumps.

Air Source Heat Pump Tune Up

Rebate: \$50

Central Air Conditioning Tune Up

Rebate: \$25

[Click here to apply.](#)

Note: 1 unit per house qualifies once every 3 years. Existing maintenance agreements do not apply.

Just like regular maintenance keeps your car running smoothly and can improve your gas mileage, regular tune ups of your cooling system can improve your home efficiency and comfort. Central Air Conditioner tune ups ensure the A/C system is running optimally. Basic cleaning, checking, and maintenance for the entire system helps diagnose minor repair issues before they result in major system damages. This routine service ensure that the system is running as efficient as possible and leaves system owners with a full refrigerant charge and a clean, healthy system that has been properly adjusted.

Central Air Conditioning

Rebate: \$100-\$225
