

For Charge Point Operators

One contract. One press of a button. Thousands of new customers.

Think big: interchange CPO extends your reach beyond national boundaries and technologies. eDrivers from can find your charging station, charge up and pay conveniently – worldwide. More visibility. More reach: more for everyone.

Visibility

Step into the light.

The interchange label shows that your infrastructure is part of the world's biggest eRomaing network: thousands of customers can locate your charging station using apps and in-car navigation systems.

Reach

Find and be found.

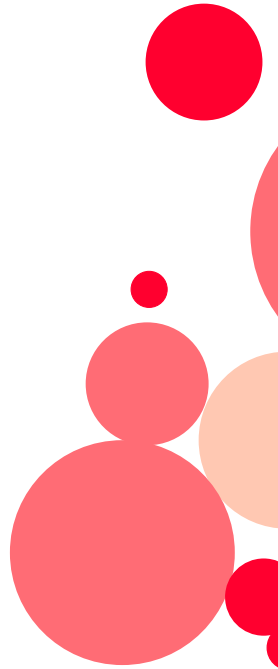

Customers get direct access to your infrastructure. And you get maximum range in the European charging network.

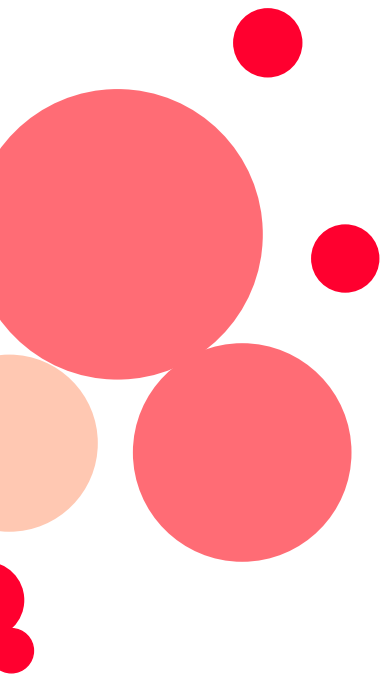

Sales

Tap the full potential.

Make more use of your charging points: interchange CPO allows an unlimited number of charging points and sub-partners to be connected up. One contract. Endless possibilities.

Without interchange

Your customers: people who buy charging current from your contract partners

With interchange CPO

Your customers: people who buy charging current from any partner in the interchange network

With interchange DIRECT

Your customers: people who buy charging current from any partner in the interchange network as well as e-drivers without electrical charging contracts

€99 PER MONTH

- Incorporate a limitless number of charging points
- No limit on number of charges

€5,000 ONE-OFF

- Project costs for connecting up the IT

WHAT WE OFFER

Strong partners

Big-name car manufacturers and global eMobility providers can work with you in the interchange network. Your common aim is to help eMobility achieve a breakthrough. And the network is growing constantly: in 2018 alone, we managed to sign more than 100 new interchange partners.

HighTech Platform

Future-proof, intuitive, proven, safe and ultra-fast: Hubject's new IT platform is the driving force behind global eMobility growth. Flexible microarchitecture, user-friendly interfaces and numerous intelligent value-adding services make it the most advanced platform in the world.

Exceptional support

We make things easy for you: our support team is ready to assist you at every stage of the connection process. Digital value-adding services make the invoicing process simpler for you.

Freedom of choice

Your customers have the choice: charging points are activated either by scanning the QR code in the interchange symbol or by using RFID cards, NFC technology or Plug&Charge as per ISO15118.
