

Looking Back Looking Forward

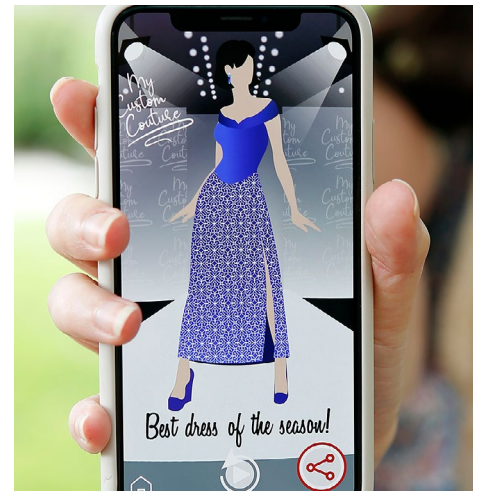

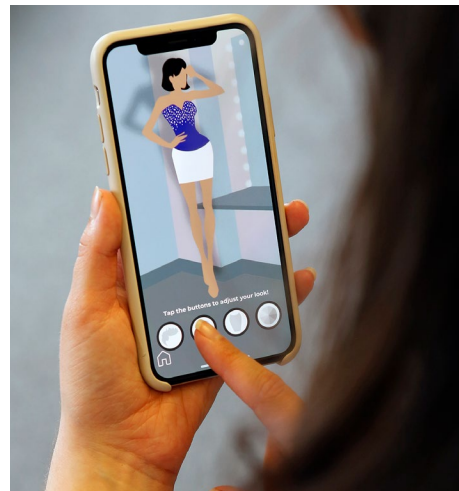

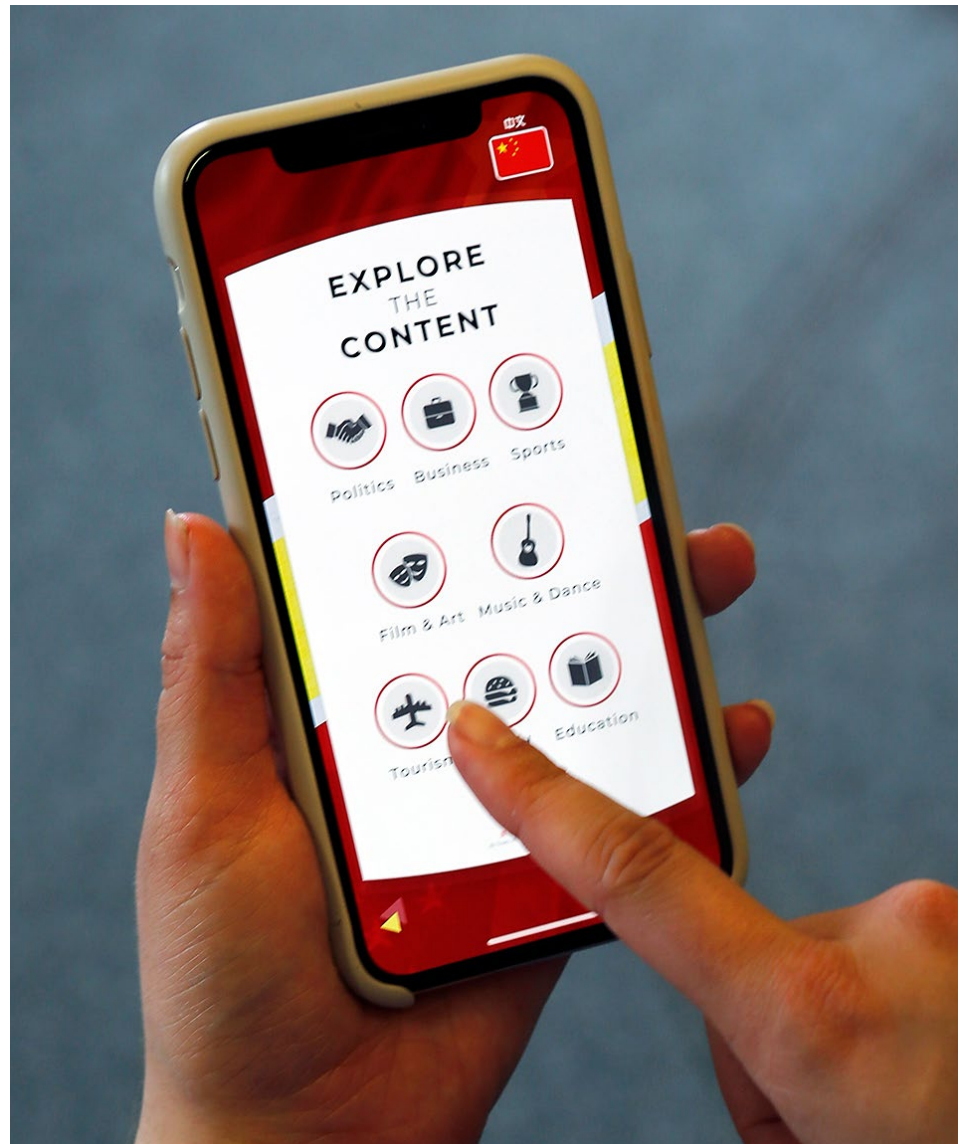

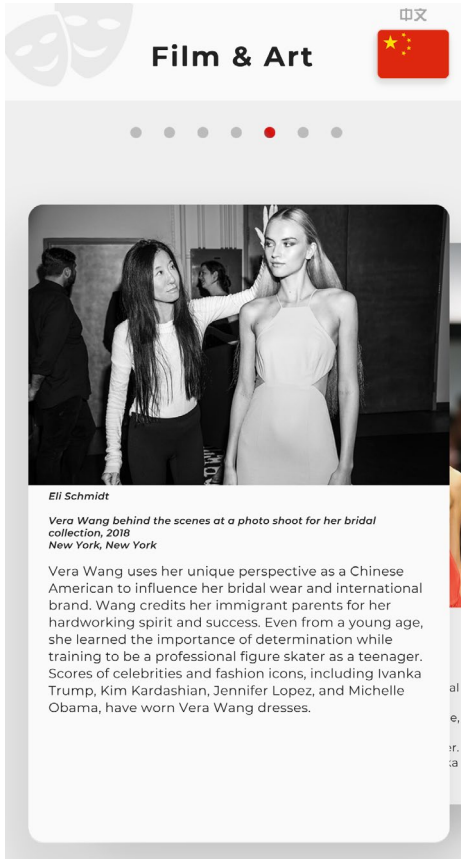

The United States Embassy
Beijing, China

In conjunction with Capitol Museum Services, Trivium developed "Looking Back Looking Forward" for Meridian International. The app complements an exhibition which celebrates the relationship the US has had with China for the past forty years. Debuting at the US Embassy in Beijing, the exhibition will travel all throughout China. Users navigate the app via different tabs which provide information on topics ranging from politics to food, tourism to sports, and everything in between. Using the code function, users can scan various codes to play games and interact deeper with the subjects explored in the app. The app is truly a celebration of our multi-faceted relationship with China.
