## About

# Prestige Dental Care

Welcome to Prestige Dental Care. We are a group of family owned dental practices offering our patients the full range of both NHS and Private dental treatments and services at multiple locations across the Midlands.

If you are looking for a new dental practice for you or your family, please do get in touch. We accept new NHS + private patients.

We look forward to welcoming you as a new patient and looking after your ongoing dental care.

We have created a comfortable, high-quality environment for our patients, and we have invested in the latest dental technology to enhance the patient's treatment experience.

We strive to provide the best possible treatment, together with excellent customer service to all patients. We look forward to welcoming you soon.

Straightening  
your teeth  
not disrupting  
your life.

**invisalign**® Clear  
braces

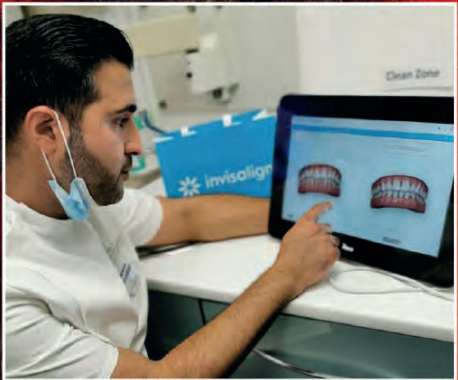

Achieving the smile you always dreamed of doesn't have to be a big deal. The traditional route to correcting issues such as crooked teeth, gaps and crowded mouths has long been fixed braces. However, the Invisalign system uses no brackets or wires - it is clear, removable and comfortable, so it won't interfere with your appearance or your life.

We know that a straight smile often means a healthy smile. Not only will Invisalign clear dental aligners straighten your teeth, they facilitate cleaning, improving your overall dental health at the same time!

The Invisalign clear aligner system straightens teeth using a series of nearly invisible, removable aligners that are custom-made specifically for your teeth. As you change each aligner, your teeth will move - little by little, week by week, gradually moving towards the projected final position.

### **Moving with you**

Realigning teeth with removable aligners is not a new treatment, but the technology used to design and construct a series of aligners has evolved, making more difficult movements more predictable.

# Smile Makeovers

---

Typically consisting of a blend of different cosmetic dental treatments and other dental solutions, the goal of a Smile Makeover is to dramatically improve the appearance of your teeth.

We offer an Initial Consultation and a subsequent Smile Assessment to discuss your options, from this we will create a bespoke Treatment Plan that is tailored to your unique needs. This might involve some of the following treatment solutions:

**Cosmetic dental veneers**

**Composite bonding & white filling**

**Teeth whitening**

**Teeth straightening (orthodontics)**

**Dental crowns & bridges**

**Dental implants fixed**

Book a virtual consultation today  
**[www.prestigedentalcare.co.uk](http://www.prestigedentalcare.co.uk)**

# Our treatment Options

## **Tooth whitening in surgery & at home kits**

The whitening systems that we provide in practice are Zoom, Boutique and Advanced Whitening.

## **Composite bonding**

Composite bonding and composite edge bonding are two processes that use composite material to bond, reshape, rebuild, or fill damaged teeth. Bonding is a very simple cosmetic procedure, but it also has a huge amount of potential for different kinds of repairs.

## **Veneers, crowns, bridges, onlays and inlays**

Dental veneers are an effective solution of modern cosmetic dentistry for someone with healthy teeth who is looking to improve the shape, size, or the colour of his or her teeth.

## **Facial aesthetics**

Sometimes just a subtle change can make all the difference. We offer facial aesthetic treatments that can rejuvenate your appearance. Just by a subtle use of a product you can have a natural looking younger you.

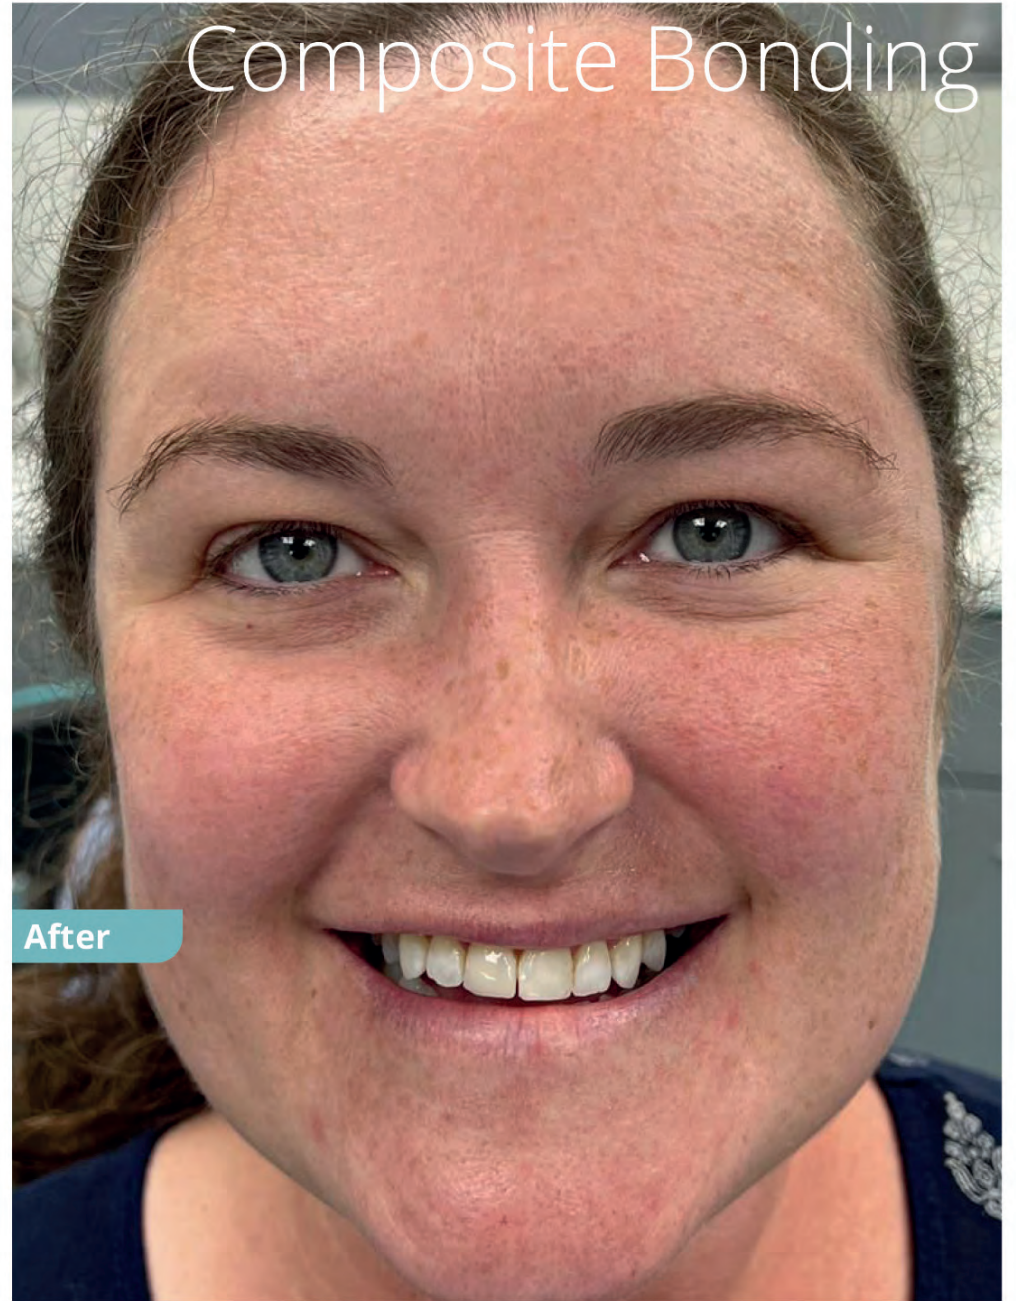

## **Dentures including chrome & valplast flexible dentures**

Dentures can be extremely effective and remain a popular choice with many. They are appealing as they are affordable and easy to look after. When fitted correctly, dentures should not present the daily challenges that are often associated with wearing them.

## **Dental Implants**

A dental implant is a small screw made from surgical grade titanium that replaces the root portion of a missing tooth. It can be placed in either the upper or lower jaw, which in time will fuse to your jawbone. Following this phase, a tooth crown is attached to your implant, depending on your requirements. We can also offer implant retained dentures and bridges.

# Cosmetic Dentistry

---

Your smile is often one of the first things that people notice about you so it's crucial that you are happy with the first impression your smile gives. Whether it's at a job interview or a first date, a great smile will have a positive effect.

A smile makeover involves one or more cosmetic dental procedures to improve the aesthetics of your smile. It is a very individual process as it is dependent on what you want, but a makeover can include a simple improvement, such as the replacement of silver fillings with more discreet white ones or repairing a chipped tooth. We can also place veneers on teeth, brighten the colour of your teeth with a whitening treatment or replace missing teeth with dental implants.

Here are some of the ways we can help improve your smile using modern cosmetic dentistry:

- Chipped, broken teeth can be repaired by composite bonding, porcelain veneers or porcelain crowns
- Missing teeth can be replaced with dental implants
- Discoloured or stained teeth can be cleaned or professionally whitened

# Why choose Cosmetic Dentistry

---

Many people with healthy teeth choose cosmetic dental treatments to enhance and improve the look of their smile, rather than for clinical reasons. A beautiful and natural smile is highly sought after and with the treatments that are now available it has become easier and more affordable to obtain.

## The Benefits of Cosmetic Dentistry

- Enhances Your Smile
- Improves Your Oral Health
- Boosts Your Self-Confidence
- Offers Long-Lasting Results
- Gives You a Youthful Smile
- Improves Your Bite
- Treats Stained Teeth
