

Hire better, faster.

Reduce interviewing effort, improve quality of hires, and increase hiring speed.

KEY BENEFITS

3x Screenings

Digital screenings with AI intelligence help uncover quality candidates faster.

True Candidate Fit

Assessments of skills, aptitude and culture improves candidate quality.

Hire Faster

Streamlined workflow and unified scoring makes hiring decisions a snap.

Today's battle for talent calls for a new approach to hiring.

The hiring market for tech talent has never been more fierce. To succeed, hiring managers need to be faster at assessing candidates, reserve live interviews for high quality talent, and move fast to make offers before they're gone. Filtered's all-in-one hiring platform provides a smooth interview experience, with unprecedented candidate insight—giving hiring managers that edge they need to radically improve hiring effectiveness.

TAKING HIRING EFFECTIVENESS TO A NEW LEVEL

The hiring platform built for today's competitive IT talent market.

Build a better recruiting engine, powered by Filtered.

Fail frauds out fast.

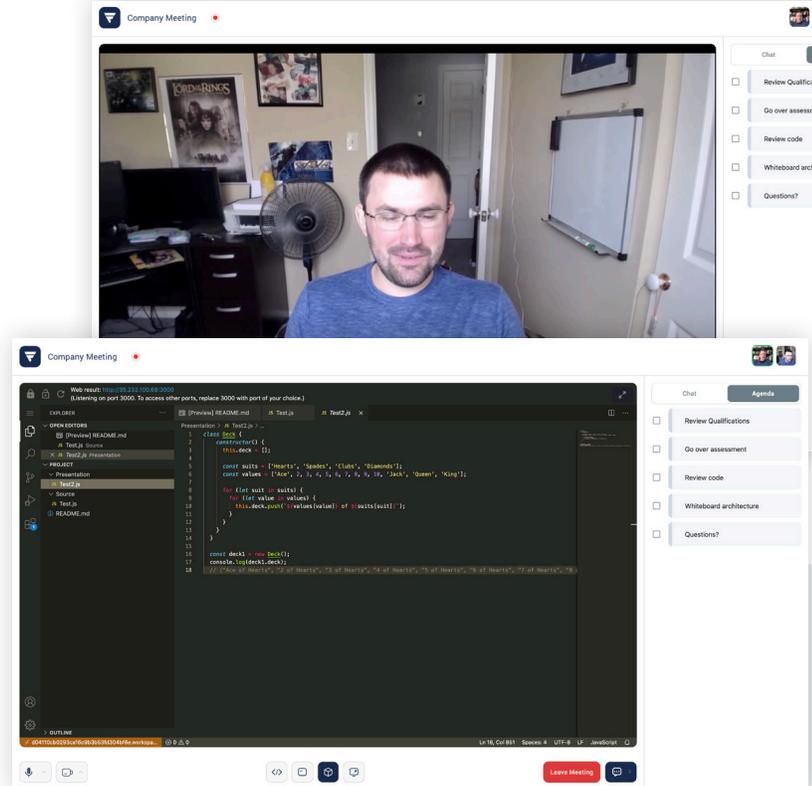

Filtered authenticates each candidate's identity by asking them to sync information from GitHub, LinkedIn, and others. Then, our AI gets to work and alerts you when candidates copy and paste answers, get help from a peer, submit identical solutions and more.

Create a powerful interview experience.

Connect your application process to Filtered to screen each candidate decisively in minutes. Invite candidates to whiteboard, perform coding challenges, or even participate in paired programming exercises. All sessions are recorded and scored, creating greater collaboration across your interview team.

Scale your recruiting efforts.

Filtered syncs with your ATS candidate information to reduce the number of systems you spend time in, and is designed to collaborate with MSPs and vendors to improve quality and time-to-fill in your contingent labor force.

“If you want to **triple** your ability to find and land high-quality candidates, you need Filtered.”
