## A modern approach to hiring.

Filtered amps up the effectiveness and efficiency of your hiring process. We merge the applications with capabilities-based assessments to create a powerful screening process designed to surface quality candidates quicker. Then we deliver a live video interview experience with whiteboard and developer options, and unprecedented flexibility—even connecting to your own development environment for more real-world examinations. Filtered ties all recorded activity and feedback into a smooth interview experience with unprecedented insight, helping you to radically improve hiring effectiveness.

Increase your hiring performance *risk free*. Email us at [info@filtered.ai](mailto:info@filtered.ai)

HIRE BETTER, FASTER

# A modern recruiting tool that drastically improves hiring effectiveness.

Build a better recruiting engine, powered by Filtered.

## Screen your candidates.

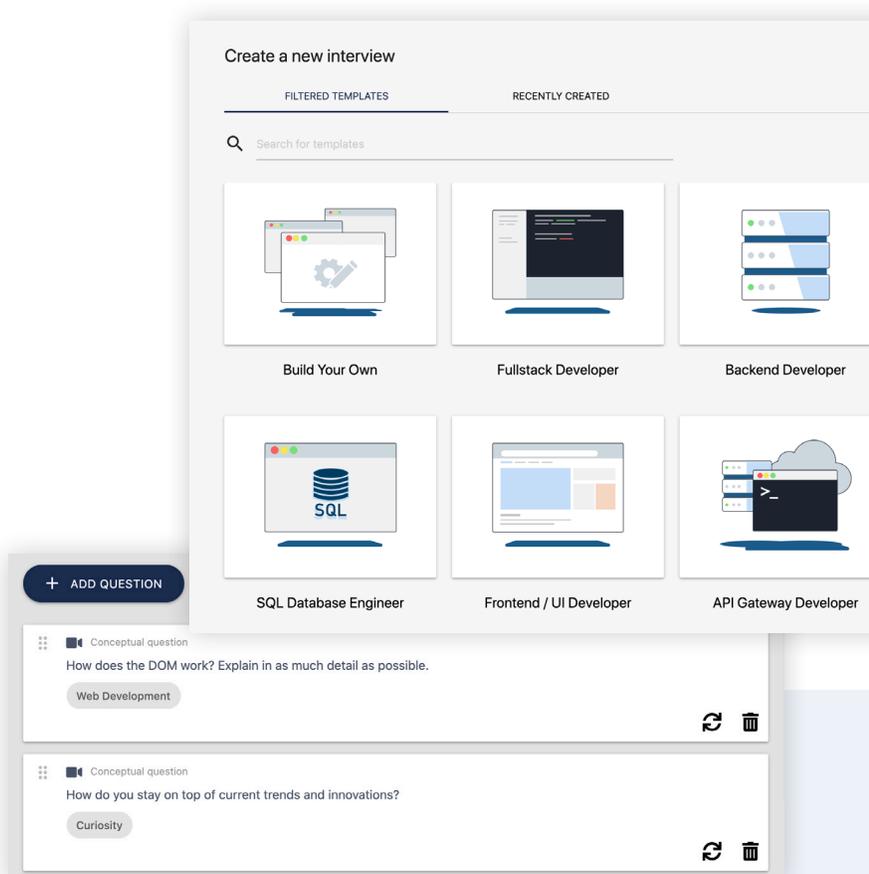

Connect Filtered capabilities-based assessments to your application process, improving the accuracy and speed of screening. Choose from one or many of our dynamic project-based templates, customize your own, or copy and paste your job description.

## Interview the front runners.

Schedule and conduct your second round interviews with Filtered Live Rooms, using our scheduling tools and video-based live coding and whiteboarding functionality. Ideal for remote hiring, regardless of final work location.

## Manage with workflows.

Segment, share, review, change status, and comment on candidate performance while taking advantage of our anti-fraud and anti-bias functionality all in one, user-friendly interface. Integrates with most ATS systems and your workflow.

**“Filtered saves time from having to do phone screens ourselves. It’s more organized in a way that multiple interviewers can actually see/hear candidates rather than reviewing notes.”**
