1 Rockers arms

2 Derailleur cages

3 Crank arms

4 Saddle

5 Spacers

6 Brake levers

High-tech materials & processes

Rely on continuous fibers of your choice and additive manufacturing to reduce weight by up to 50% and save costs vs. aluminum.

Performance meets sustainability

Produce with recyclable, bio-based, thermo-plastic materials and low-carbon footprint processes.

From idea to production in weeks

Leverage the most advanced software and manufacturing technologies, engineered in Switzerland. Be independent from established supply chains.

Cost competitive

Produce high-quality, unique carbon composite pieces at a fraction of the cost of conventional manufacturing thanks to an automated manufacturing technology.
