TECHNOLOGIES

DR. FALK-FLORIAN HENRICH

FOUNDER & CEO SMART STEEL TECHNOLOGIES

Dr. Falk-Florian Henrich is founder and managing director of Smart Steel Technologies. The company offers AI-based software products to optimize steel production. Leading steel manufacturers apply SST software 24/7 in production. After a very short setup project, production quality is substantially increased and energy consumption is reduced.

Prior to founding Smart Steel Technologies, Dr. Henrich built the high-tech company Celer-aOne (2011-2018), established it as the market leader in the paid content sector and sold it to Axel Springer SE.

Dr. Henrich holds a PhD in mathematics and contributed substantial research to the theory of loop spaces of Riemannian manifolds and artificial intelligence.
